VICK'S TREE AND PLANT SALESMAN

Be Sure and Read This

JAMES VICK'S SONS ESTABLISHED 1849—68 Years Selling by Mail

ORDER NOW.—Do not wait until you are ready to plant. The earlier orders are placed the better it is for both you and ourselves. If it is necessary that your order be shipped on a certain date, state so plainly on the order sheet. We try to ship our orders in rotation—**order early and you will get your stock early.**

HOW TO ORDER.—Make out your order on our regular order sheet. State plainly how many and of what variety of trees and plants you want. Write your name and address and shipping directions carefully.

It will be a great convenience if all orders for the nursery department are kept separate from seed and plant orders, for **fruit and ornamental trees simply cannot be packed with other goods, as it would upset shipping arrangements and delay expeditious handling of our goods.** Even if you find it more convenient to send one remittance to cover both your seed, plant and bulb order and your nursery order, be sure that the nursery orders are sent on a separate sheet from orders for other goods.

SEND PAYMENT WITH YOUR ORDER.—Get a money order at your express or post office, or a draft at the nearest bank. If you send cash be sure and register your letter. Do not put silver loose in an envelope. You will lose it. **MAKE MONEY ORDERS PAYABLE TO JAMES VICK'S SONS, ROCHESTER, N. Y.**

RATES.—1 to 4 trees are sold at each rate. 5 to 49 are sold at 10 rate. 50 to 299 at 100 rate. 300 or more at 1,000 rate.

COLLECTIONS.—We cannot make any changes in our collections, for they are selected and bundled before our busy shipping season, and the valuable time saved by doing this makes it possible for us to offer these collections at greatly reduced prices.

DO NOT CONFUSE OUR PRICES WITH THOSE ON CHEAP STOCK. WE SELL GOOD TREES AT REASONABLE PRICES. BUY FROM AN OLD RELIABLE HOUSE—"VICK QUALITY" KNOWN FOR SIXTY-EIGHT YEARS.

SPECIAL PRICES ON LARGE ORDERS.—Send us in a list of the number and variety of trees you want. We will give you special quotations on large orders.

OUR TERMS ARE CASH WITH ORDER.—Large shipments will be sent C. O. D. if one-fourth cash is sent along with the order. We do not prepay freight, express or mail charges on trees and plants.

NO PACKING CHARGES.—We do not charge for packing, boxing or delivering to freight or express companies at Rochester. **Our prices are Free on Board cars at our nurseries.** If you have no agent at your station and shipment has to be prepaid, notify us and we will prepay and bill charges to you after shipment.

OUR GUARANTEE.—We exercise care to have our stock genuine and reliable, and hereby guarantee that if all, substantially all, of any part of stock delivered does not prove true to name as ordered, we will replace it free of charge, or refund the money paid for it, that being the measure of damages for a breach of the contract.

**Trees and plants at the prices listed in this book are not prepaid.
For Parcel Post rates see next page.**

No. 167

State of New York
DEPARTMENT OF AGRICULTURE

Certificate of Inspection of Nursery Stock

This is to Certify that the stock in the nursery of
JAMES VICK'S SONS

of Rochester, County of Monroe, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose Scale or other dangerously injurious insect pest or pests. This certificate expires September 1, 1917.

CHAS. S. WILSON,
Commissioner of Agriculture.

Dated, Albany, N. Y., September 8, 1916.

A WORD ABOUT PLANTING

Most of the failures experienced in the planting of trees, shrubs, etc., result from a want of knowledge of conditions necessary to success, or from a careless disregard of them. We are interested in the success of every article we send out; we take the greatest pains to place every item in the hands of our customer in the best possible condition, and in order to furnish some precaution, which our experience suggests, we give a few hints on such points as are most essential.

Trimming Trees.—It is surprising how many trees you see planted and left with the full amount of limbs on, just as they came from the Nursery. The following suggestions may help you trim the roots and tops correctly. Cut off all bruised roots with a smooth cut on a slant that leaves the face down. After the tree has been planted, trim off altogether such limbs as are crooked and ill-shaped close to the trunk. Other limbs that you want to save to form the head of the tree, cut back to within six buds of the trunk. If the tree has a center leader, it will put out a second story of limbs and in this way you will get more fruit-bearing wood. There are two ways of forming the head of a tree, making a high head by cutting off all the lower branches and forming the head as high on the trunk as possible; and the low-headed way leaving the lower branches on and cutting out the center branches, opening up the head and forming the tree with a short trunk, with the greater part of the limbs close to the ground. This low-headed style has been growing in popularity for some time, and has been found a very satisfactory way to form a tree for the home garden, as the fruit is so easily picked.

How to Take Care of Trees on Arrival.—If not ready to plant when trees arrive, unpack them, but do not leave the roots exposed to freezing temperature. Dig a trench in some high, dry ground and heel-in covering the roots with earth, followed directly with plenty of water around the tree. Leave them in the trenches until you are ready to set them out. If frozen

on arrival, leave in the box or bale and place in a cellar or in a cool dark room that is free from frost, and let them remain until frost has disappeared. Do not expose frozen trees to heat, light or air. Trees or plants frozen solid will not be injured if handled in this way. If the roots and packing are dried up when received, bury them in earth, or place in water from ten to twenty hours.

Planting.—Make the holes large enough to admit the roots without any cramping or bending, and deep enough to bring the tree to its natural depth. The fine surface soil should be used in covering the roots and should be carefully worked among them. If the ground is dry, pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots by exerting the full weight of the planter upon it. Omission to pack the earth solidly around the roots is a frequent cause of failure in planting Nursery Stock. Always remove the label when planting. Do not put manure in contact with the roots, for it burns them.

After Culture.—Grass should not be allowed to grow around your trees or plants. The ground should be cultivated for a space at least one foot outside the roots. The trees should be pruned regularly each spring, cutting out old dead limbs and shaping the tree to the form the planter wishes it. If this is done regularly each season, the removal of large branches will be avoided.

PLANTS BY PARCEL POST

Plants of all kinds are now admitted to the mails at regular Parcel-Post rates.

Plants vary so much in weight it is impossible to give the exact weight of any order until it is actually packed. We are, therefore, giving the approximate weight of the different species of plants, etc., and the Parcel-Post rates for the different zones. After making up your order you can easily calculate the approximate weight. You can then ask your postmaster which zone Rochester, N. Y., is in from your post office and, with the zone rate published below, you can easily calculate the amount of postage to send.

All postage on plants, etc., has to be prepaid, and if a sufficient amount to pay the Parcel-Post charges is not sent with the order, the plants will be sent by express, charges collect, as we positively cannot keep accounts and send bills for small items of postage.

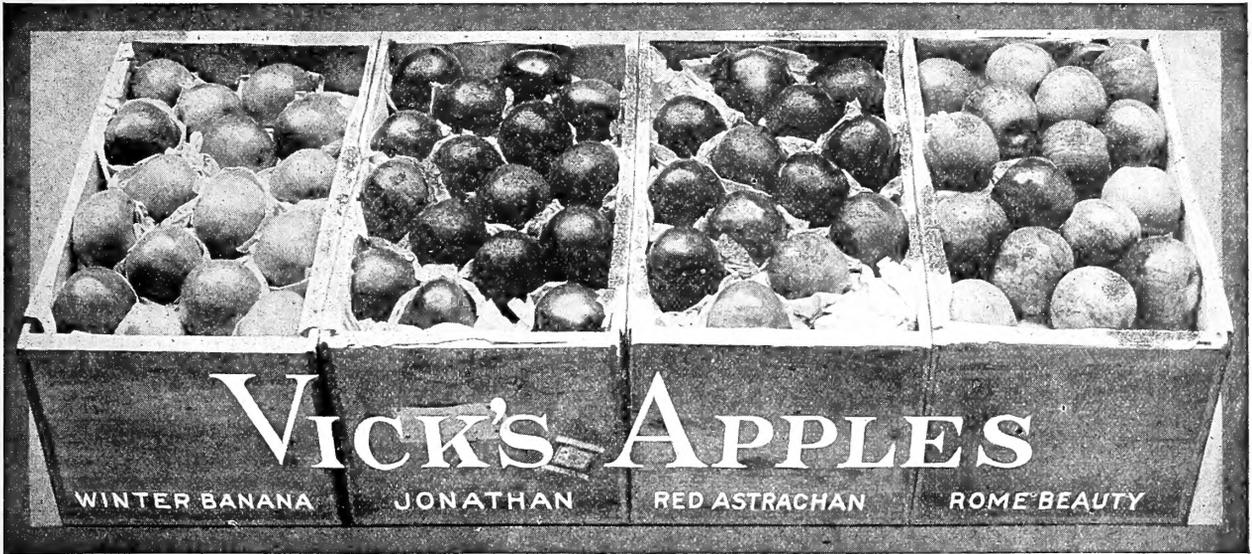

Packages weighing five or six pounds or more, going west of the Mississippi River will generally cost less for transportation by express. Large packages can be shipped better and usually cheaper by express.

VICK'S APPLE TREES

Heading all other fruits is the apple. It is the most widely known, best liked and most useful of all. A careful selection of varieties will give you ripe fruit from early August until the following May. In this book we list and describe the best of the Summer, Autumn and Winter kinds. The trees we offer you are of standard "Vick Quality," hardy, clean and well rooted; with straight trunks and well branched heads.

**PRICES OF
APPLE TREES**
except where noted

Largest size, XXX, 5 to 7 ft.....	30c	\$2.50	\$10.00	\$20.00
Medium size, XX, 4 to 5 ft.....	25c	2.00	8.00	16.00
Smallest size, X, 3 to 4 ft.....	20c	1.50	5.00	10.00

Baldwin (Winter).—Without question, the leading commercial variety in New England, New York, Ontario, Ohio, Michigan and in many sections from Colorado to Washington. Absolutely dependable. Fruit large, firm, moderately coarse, crisp, rather tender, very juicy, agreeably sub-acid. Skin yellow or greenish, blushed, mottled and striped with bright red and deep carmine. Tree large, very vigorous, strong and hardy. Ripens in November, lasts until May.

Ben Davis (Winter).—Finest keeper known; fine looking; large, round; yellow, with red stripes; flesh white, juicy, sub-acid, coarse. Tree rapid in growth, healthy and vigorous, bears early, annually and abundantly. Good filler.

Duchess of Oldenburg (Summer).—Medium size; red striped; flesh white, juicy and excellent flavored. Trees are natural dwarf growers and make fine fillers; require small root and branch space. Crops nearly always large. Tree among the hardiest and one of the few that will stand the climate of Iowa, Minnesota, Montana, and other cold locations. You can depend on Duchess to yield apples you can sell for good prices.

Early Harvest (Summer).—An early summer apple of medium size, pale yellow, tender, juicy and of fine flavor. A great cooking and dessert apple and very popular for the home orchard. Tree bears large crops regularly.

Fall Pippin (Fall).—Large, yellow, tender, juicy and rich. A favorite cooking and eating apple.

DELICIOUS (Winter).—Of peculiar and distinctive shape; brilliant dark red, shading off to golden-yellow at the blossom end; flesh fine-grained, juicy, crisp and melting; flavor sweet with a slight acid taste. This apple is gaining in favor each year as one of the profitable commercial varieties. Tree vigorous, thrifty and a good, dependable cropper.

Fine extra large trees of Delicious
..... 50 cents each, \$4.00 per 10
Fine second size trees of Delicious
..... 40 cents each, \$3.00 per 10

Fameuse or "Snow Apple" (Fall).—A handsome red striped apple. Flesh snowy-white, juicy and of fine flavor. Very popular eating apple.

Golden Russet (Winter).—Clear golden russet color. Good in cold sections. Brings good prices. Keeps until May in cold cellar.

Greening (Rhode Island Greening).—An old standby in all apple sections, more widely planted than any other kind, except the Baldwin. Its color is against it for export. One of the best cooking apples and good for table use. Fruit large, green, sometimes with red cheek. Tree is very vigorous and a big producer, though it does not bear very young. Season October to February. Origin Rhode Island.

Gravenstein (Fall).—Orange-yellow with stripes of light and dark red; tender, juicy, aromatic, sub-acid. Good size and attractive appearance. Ripens late in September, lasts to early November.

Jonathan (Winter).—Very late keeper. Medium to large; brilliant red; very highly flavored, juicy, fine-grained, tender, mild, sub-acid. Quality is fine for home use and for marketing in large or small quantities. Will keep well without special care, and also stand much handling. Tree long-lived, but comes into bearing very young and produces big crops every year.

Northern Spy.—This variety stands third in commercial importance in the Eastern fruit sections. Fruit large, fine color, bright red unless shaded too much, with a delicate bloom. Flesh is juicy, crisp and tender. Many persons prefer it to any other for table use or cooking. Always brings highest market prices. Ready to eat in November and will keep in storage until June.

Maiden Blush (Fall).—One of the most beautiful; pale lemon with crimson cheek; flesh white, tender and crisp. An old-time favorite which is still one of the most popular apples. Tree vigorous and good bearer.

McIntosh Red (Fall).—A Canadian apple; keeps long, but is mellow and good to use almost from the time it is picked till the next crop comes. Requires no special storage to be kept like fresh. Fruit tender, juicy, sub-acid. Quick and spreading grower; long-lived; bears big crops. McIntosh Red is the apple now making Montana's Bitter Root Valley famous. There, as well as in New England, New York and Michigan, its high quality and attractive appearance put it in the lead. It is extra good for all the higher and colder sections. Trees bear in three and four years, and make fine fillers.

King of Tompkins County.—A superb red apple of extraordinary size and fair quality; the flesh is slightly coarse, but tender and vinous. An abundant annual bearer. November to March.

Red Astrachan (Summer).—A reliable cropper that comes into bearing young. Fruit medium size, crisp, tender, juicy, sub-acid. Skin pale yellow striped with deep crimson, covered with a distinct bluish bloom. Tree medium size, vigorous and hardy. Ripens in July, lasts until September.

Rome Beauty (Winter).—A very fine market variety for the northern and western states. Fruit very large, skin yellow, mottled with bright red; in highly colored specimens almost solid red on exposed cheek; striped with bright carmine. Flesh crisp, juicy, agreeable, mild, sub-acid. Ripens in November, lasts to April or May.

Stayman (Stayman's Winesap) (Winter).—Very late keeper, but mellows for use in the fall. Medium to large, attractive; green and yellow, almost hidden by dark red stripes; flesh yellow; plenty of juice; quality the finest. Tree a quick and large grower, and seems to prefer dry soils and those not so rich and heavy.

Spitzenburg.—Medium-sized apple completely covered with red. The flesh is of good quality, crisp, juicy, sub-acid. When well grown and packed in boxes the fruit brings a very handsome price. Its season is between R. I. Greening and Baldwin. In cold storage Spitzenburg may be held until June.

Sweet Bough.—A large pale yellow apple, one of the really good summer varieties and best early sweet apple. Sweet Bough ripens through a long season, the tree is a very young and prolific bearer and long lived. This variety should be in every orchard. Fruit begins ripening in August.

Talman Sweet.—Splendid sweet winter apple. Light yellow in color with a faint blush cheek. Tree is a good grower, long lived and very hardy. Comes in bearing at an early age and is a reliable cropper. Season November to April.

Twenty Ounce.—Very large, yellow and red, tender, juicy, crisp, sub-acid; productive. October to January.

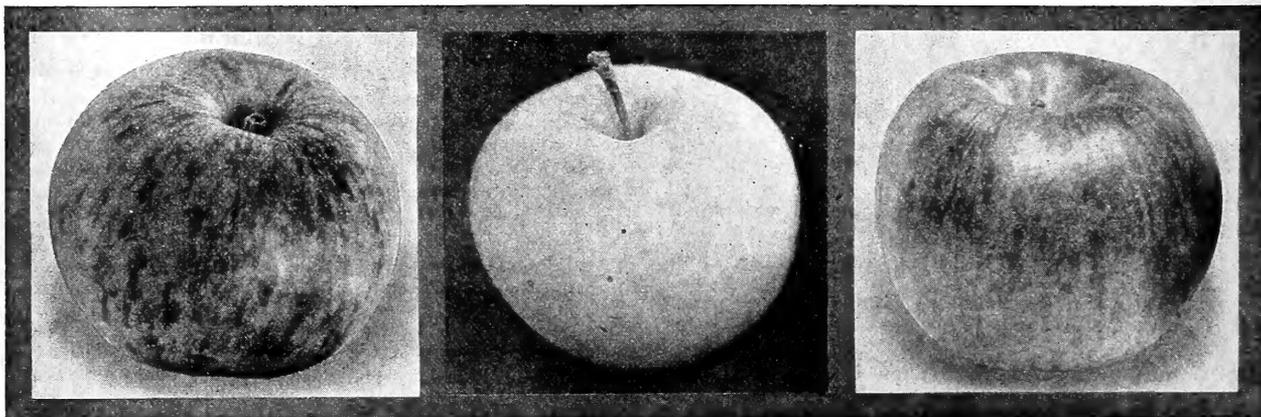

Wagener.—A quick grower and very thrifty. Planted as a filler for orchards, bears an abundance of fruit when young; of dwarf habit. The fruit is medium to large, skin tough and bright light red color; flesh whitish, firm, crisp, tender, very juicy and sub-acid; of the very best quality. Season is from October to February or later.

Winter Banana (Winter).—A magnificent dessert apple, which on account of its attractive appearance and fine quality commands a readier sale and higher prices than most apples. The fruit is large and keeps all winter. Flesh whitish, tinged with pale yellow, firm, crisp, tender, sub-acid. Skin clear pale yellow with beautiful pinkish red blush. Tree vigorous and hardy. Ripens in December, lasts until April.

Yellow Transparent (Early Summer).—Medium to large; tender, juicy, of fine flavor, sub-acid, fragrant. Trees very young bearers and yield big crops every year. Hardy, dwarf growers; prefer thin soil, such as hillsides and upland. One of the best.

Additional Varieties

Chenango Strawberry, Alexander, Wealthy, Bismarck, Rambo, Wolf River, Sutton Beauty, N. W. Greening, Bellflower, Red Canada, Grimes' Golden, Stark, Lady Apple, York Imperial.

Northern Spy

Yellow Transparent

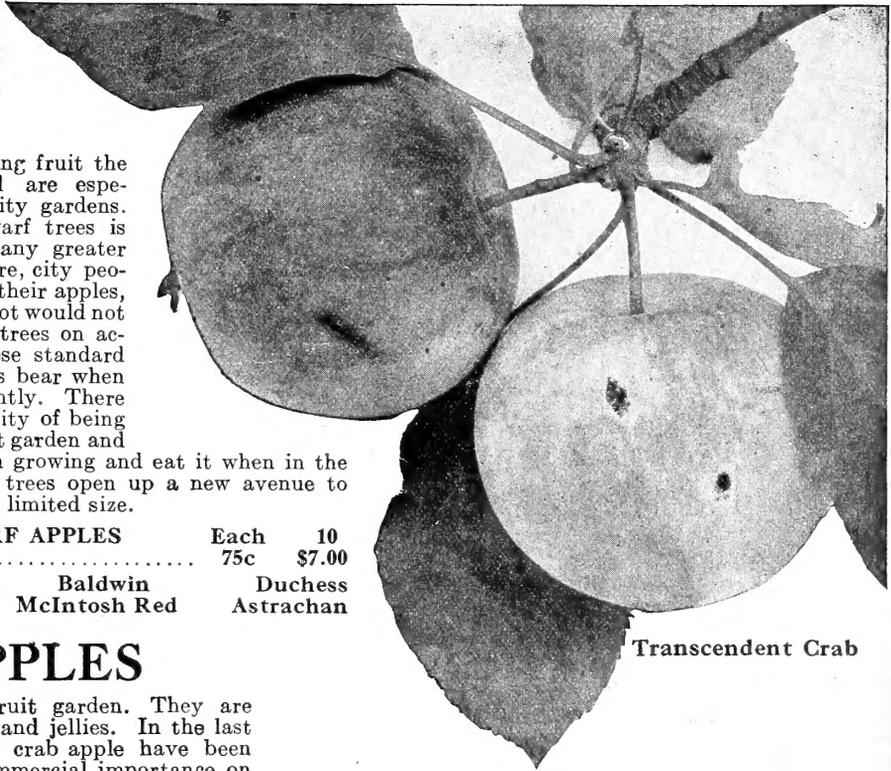

McIntosh Red

DWARF APPLES

Dwarf apples commence bearing fruit the second year after planting and are especially desirable for village or city gardens. The big advantage of these dwarf trees is that they do not attain a size any greater than peach, plum, etc. Heretofore, city people have been obliged to buy all their apples, because the size of their garden plot would not enable them to plant standard trees on account of the amount of space these standard trees required. These dwarf trees bear when very young and bear very abundantly. There is no question as to the desirability of being able to go out into your own fruit garden and pick fruit from trees of your own growing and eat it when in the freshest condition. These dwarf trees open up a new avenue to the people who have gardens of a limited size.

Transcendent Crab

CRAB APPLES

Include the crabs in every fruit garden. They are delicious for cooking, preserving and jellies. In the last few years immense orchards of crab apple have been planted, for they are now of commercial importance on the city markets. They are easily grown, and cheaply picked and handled. A row of crab trees is often planted on the exposed windy side of the orchard. They protect the other trees and pay a profit. They are very ornamental and can be planted in a corner of the yard or garden. They are beautiful when in bloom, and in fruit they are an immense leafy cluster of little red and gold apples.

PRICES ON 2-YEAR-OLD TREES

	Each	10
XXX Grade, largest size.....	35c	\$3.00
XX Grade, medium size.....	30c	2.50

Hyslop.—A summer crab apple. Very popular because of its large size, beautiful red color and hardness. Sharp acid flavor. Good for preserves, jellies and cider. Season October and November, but may be kept well into winter in cool cellars.

Excelsior.—Fruit very large, being nearly as large as a medium sized apple. Color yellow splashed with red. A good cooking apple because of its fine flavor. Ripens early. Tree hardy and productive. Season September and October.

Martha.—Another good variety for all sections. A rapid grower and a great bearer of handsome fruit. Bright, glossy yellow shaded with bright red. Fine tart flavor, surpassing all others for culinary purposes. Season, October and November

Transcendent.—All things considered, this is one of the most valuable varieties of crab apples grown. Tree remarkably vigorous and immensely productive. Makes a fine market apple. Golden yellow with rich crimson cheek. Good flavor. Season September and October.

Whitney.—A very hardy and prolific variety. Fruit is handsome and delicious. Excels for making fine jellies and preserves. Season, late September and October.

QUINCES

Succeeding nearly everywhere as it does, the consumption of Quinces can easily be increased ten-fold. The demand exists—it needs only to be supplied. As a fruit for preserves, jellies and syrup, it takes a position of first rank—the good housewife is as careful to put up a supply of them as she is sure to lay by for the winter a stock of Montmorency Cherries.

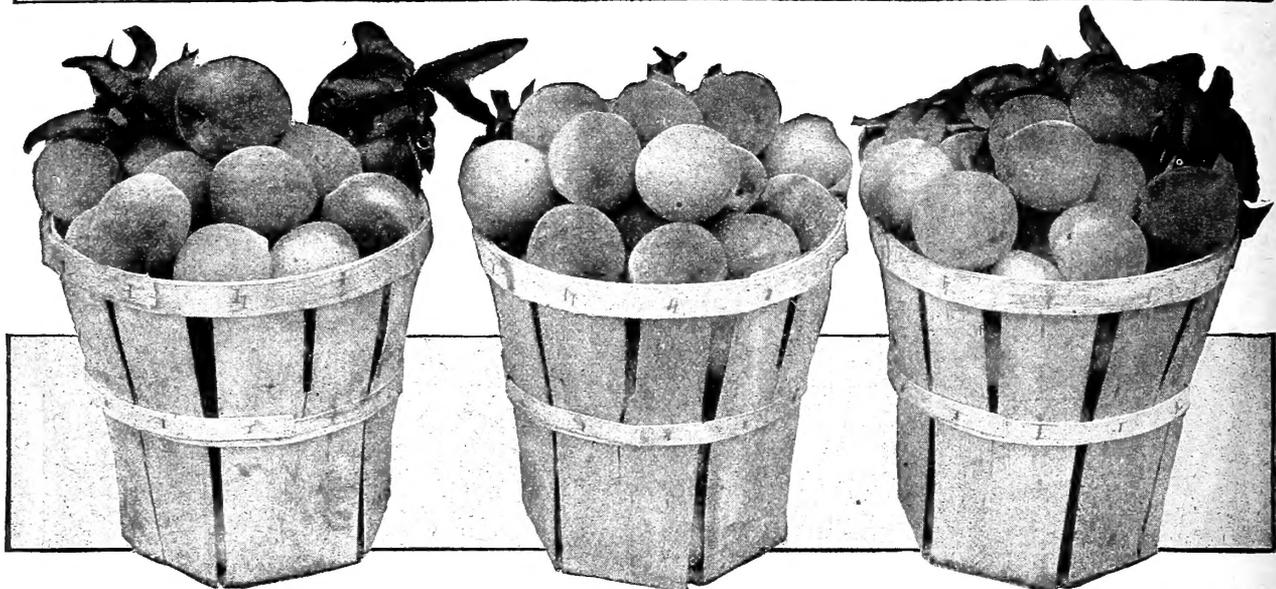

PRICES OF QUINCE TREES

	Each	10	100
XXX Grade, largest size.....	40c	\$3.50	\$30.00
XX Grade, medium size.....	35c	3.00	25.00

Rea's Mammoth.—A large bright yellow quince with very pleasing flavor. The tree is a hardy grower and very productive.

Champion.—Will bear more quickly than any other variety. Trees in the nursery row often bear when two years old. The fruit is large and handsome. Flesh cooks as tender as an apple and without hard spots of cores. Very fine for preserves, jellies, marmalades, etc. The tree is vigorous, hardy and very productive. Champion is a fine all around quince. Ripens in November.

Orange.—More largely planted than any other variety. One of the old varieties that always bear and give good satisfaction wherever planted. Orange is large, bright golden yellow. Cooks very tender and has a great flavor. There is always a demand for this quince.

ROCHESTER PEACHES MORE PRODUCTIVE THAN ELBERTA

VICK'S PEACH TREES

Here are different varieties of peach trees that will give you fruit from July until the middle of October. Plant a few trees in your yard; they take up very little space and return you many times their value in delicious, fresh fruit. No home is complete without some fruit trees.

THE ROCHESTER PEACH

The ROCHESTER is in a class by itself because it is the only good sized yellow freestone peach, of fine quality, ready for market in the middle of August in the North.

The fruit is large, yellow with a most attractive red blush, juicy and delicious, and keeps well; an excellent shipper even after much handling. Its greater sweetness over other peaches requires only half the usual quantity of sugar in canning; it does not rot on the trees.

The tree is a strong, symmetrical grower; a regular bearer of big crops and absolutely hardy;—in all of which qualities it surpasses even Elberta.

Price, XXX Grade, 5 to 6 ft., 35c each; \$2.50 for ten \$22.00 per hundred.

Price, XX Grade, 4 to 5 ft., 25c each; \$2.00 for ten; \$18.00 per hundred.

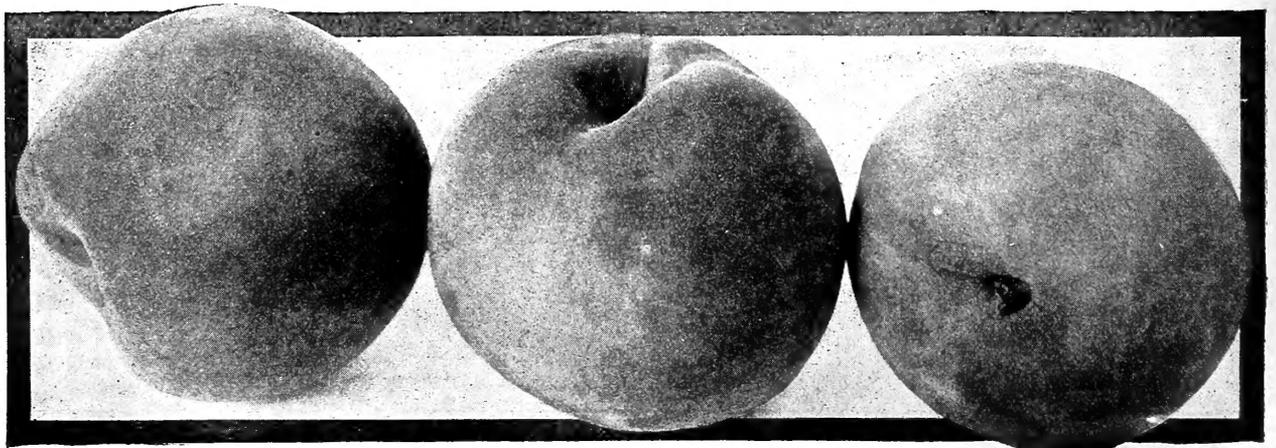

THE HALE PEACH

A mammoth peach nearly one-half larger than the well known Elberta and as large again as Early Crawford. In color it is a rich, deep, golden yellow overlaid with bright carmine. The flesh is very solid and of fine quality. Has a smooth skin with practically no fuzz on it. Its juicy, rich, sweet flavor cannot be excelled. Both for table use and canning it is very superior. Does not rag out in the can. A wonderful keeper and can be packed and handled almost like apples. Ripens about a week ahead of Elberta. Late bloomer and very hardy. Bears fruit when very young.

Price, XXX Grade, 5 to 6 ft., 50c each; \$4.50 for ten; \$35.00 per hundred.

Price, XX Grade, 4 to 5 ft., 35c each; \$3.00 for ten; \$25.00 per hundred.

HALE PEACHES—RICH, JUICY AND SWEET—HAVE NO SUPERIOR

PRICES OF VICK'S PEACH TREES (except where noted)

4 to 6 feet, XXX Grade..... Each, 20 cents; 10 for \$1.80; 100 for \$15.00
 3 to 4 feet, XX Grade..... Each, 15 cents; 10 for \$1.35; 100 for \$12.00

Carman.—A new, hardy, rot-proof peach ripening from the middle to end of July. Fruit is large, oval shaped, yellowish white. Flesh is creamy-white, slightly tinted with red, juicy and fine. Fine shipper and is freestone.

Mountain Rose.—A favorite in New Jersey where it ripens early and grows to large size for so early a peach. A reliable cropper. Color white with carmine cheek, inside creamy-white, abounding in rich, sweet juice. Considered first quality for dessert. Early August.

Yellow St. John.—A beautiful yellow peach, medium to large in size. The skin is brilliantly flushed on the sunny side with bright deep crimson. The flesh is yellow, tender, juicy and altogether of extra fine quality. Free. The tree is a strong grower and bears heavy crops every season. So early, this peach reaches the market at a time when the demand for early fruit is at its height.

Belle of Georgia.—Ripens first half of August. Fruit very large and most attractive in color and shape, with a light red cheek; flesh white, firm and delicious; in all ways the quality is fine. Trees grow quickly and shapely, are hardy and prolific. Free.

Champion (Freestone).—Ripens about August 10th. An excellent, showy white peach. Fruit large, creamy-white with beautiful red cheek. Sweet, tender, juicy, of very high quality and a good shipper.

EARLY ELBERTA.—The Early Elberta is truly named. It is of the Elberta type, a large, golden-yellow peach with a rich crimson blush on the sunny side. The fruit is large, of good shape and better color than Elberta. For canning it has better flavor, sweeter, not requiring nearly so much sugar and keeps firm in the can not ragging out. Early Elberta ripens about ten days before Elberta, and along with Crawford Early.

Price, XXX Grade, 5 to 6 ft., 30c each; \$2.50 for ten; \$22.00 per hundred.

Price, XX Grade, 4 to 5 ft., 25c each; \$2.00 for ten; \$12.00 per hundred.

Crawford's Early (Freestone).—Last of August or beginning of September. A magnificent large yellow peach of excellent quality. In our estimation the best flavored and best variety for the home garden. Not as good a shipper as Elberta, but better flavored. Most people, when they buy peaches, ask for Crawford's as they know little about any other varieties. Vigorous and productive.

Fitzgerald.—Origin, Canada. Fully equal to Crawford. Early in size, quality and color, with much smaller pit; a very early bearer, often when two years from bud; extra hardy, succeeding in Canada and in Michigan perfectly; fruit large, brilliant yellow with red cheek; highest quality; ripens after Crawford's Early. Freestone.

Brookville, Ind., April 26th, 1915.

James Vick's Sons, Rochester, N. Y.

We received the fruit trees Saturday evening—which we had ordered from you. We found them in fine condition. R. No. 1, Box No. 32. H. G. Heeb.

Liberty, N. Y., April 12th, 1916.

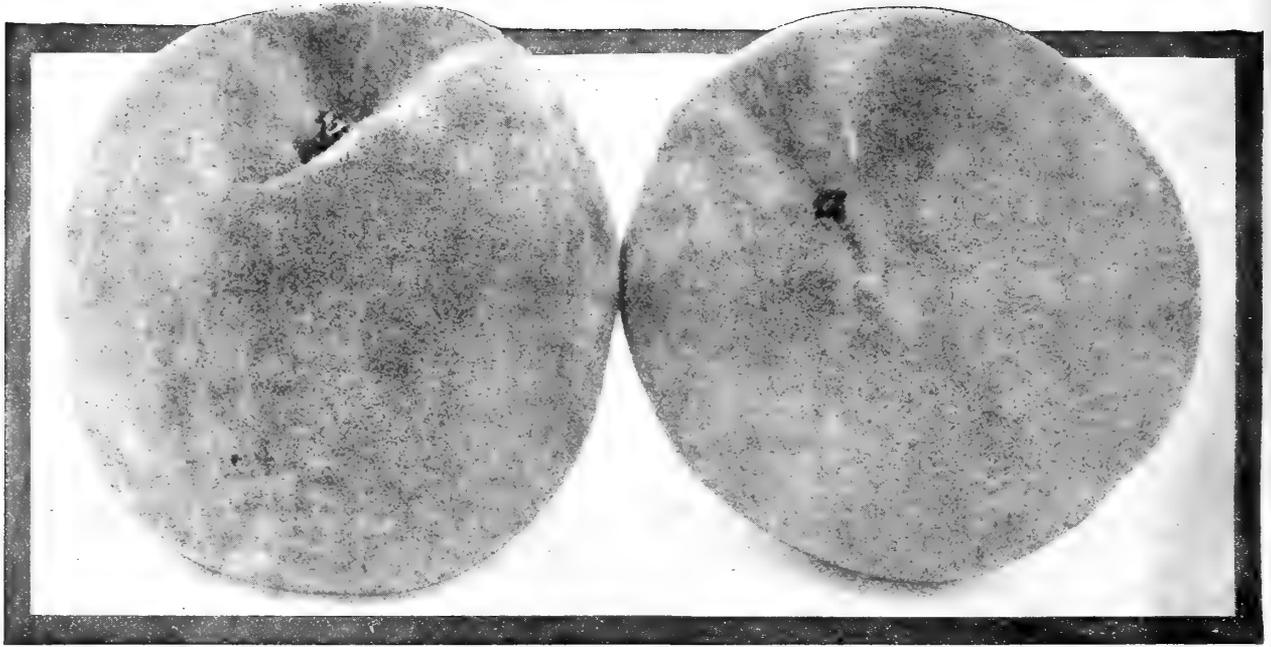

James Vick's Sons, Rochester, N. Y.

My order No. 6326 arrived, and wish to thank you very much for same. I have been very much pleased, and the trees are fine. M. Iglesias.

Elberta.—The greatest commercial Peach on the market today. This variety is the most popular all over the country and there are more of these grown than of any other kind. It is undoubtedly one of the best orchard kind and also is valuable for garden planting. The tree is very hardy and a productive and uniform cropper. The fruit is large, yellow with red cheek; it is juicy and high flavored. Flesh is yellow and fine. It is a freestone Peach and ripens about 10 days later than Early Crawford.

ELBERTA

Early Crawford Peaches have been a Garden Favorite for years

Niagara.—Fruit a beautiful golden-yellow blushed with brilliant red. Resembles the Elberta very much, but is larger in size. It has been thoroughly tested by extensive orchard planting near Rochester, N. Y., and found to be an unusually fine commercial variety. The quality and flavor of this peach are exceptional. It is free from yellows and leaf curl and is a good bearer.

Kalamazoo.—A large yellow peach of very good quality. Tree is hardy and very productive. Popular in Michigan, Ohio, Pennsylvania and New York. A good freestone commercial variety.

Chair's Choice.—A very large deep yellow peach with red cheek. Has yellow flesh that is firm and of fine flavor. Pit is perfectly free. This is a strong grower and good bearer. Ripens just before Smock. October.

Stump (or Stump the World).—Very large, roundish; skin is white with a bright red cheek; flesh is white, juicy and good. Tree is vigorous and productive. Ripens near the end of September and is freestone.

Crosby.—A beautiful yellow freestone peach with very small pit. Excellent flavor, large size, color orange-yellow, with carmine on the sunny side. Very beautiful; tree of willowy growth, like Wager; rather dwarf; ripens between Early and Late Crawford.

Crawford Late.—Fruit large size; yellow with dull red cheek. Flesh yellow. Tree vigorous and productive. Fine late September variety. Freestone.

Smock.—A large sized peach having a yellow color with a red cheek. The flesh is yellow and juicy. One of the best varieties. Freestone.

Lorain Ohio, April 17th, 1916.

James Vick's Sons, Rochester, N. Y.

Gentlemen:—

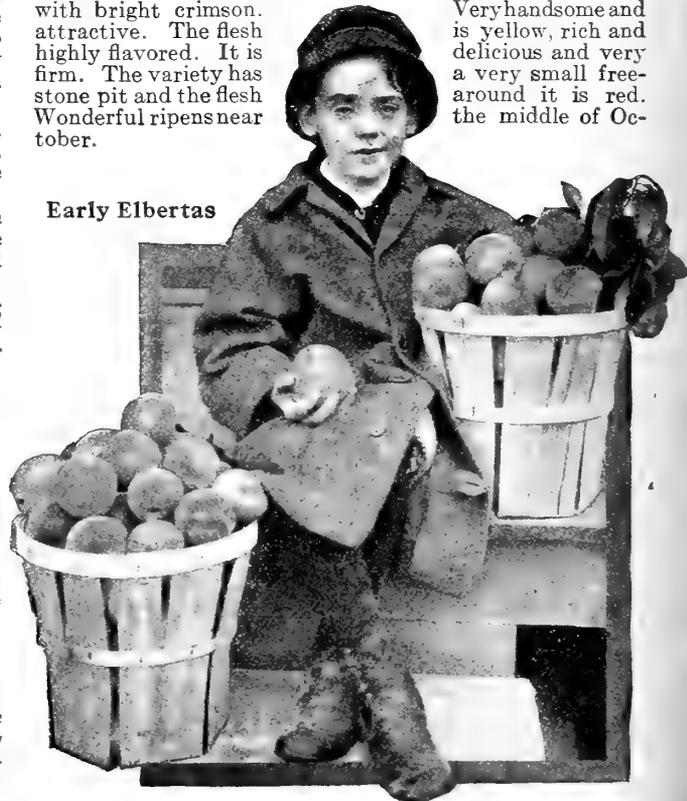

Trees received on the 11th in good condition. They are fine, and we are greatly pleased with them, and how nicely they were packed. We have them planted according to planting directions.

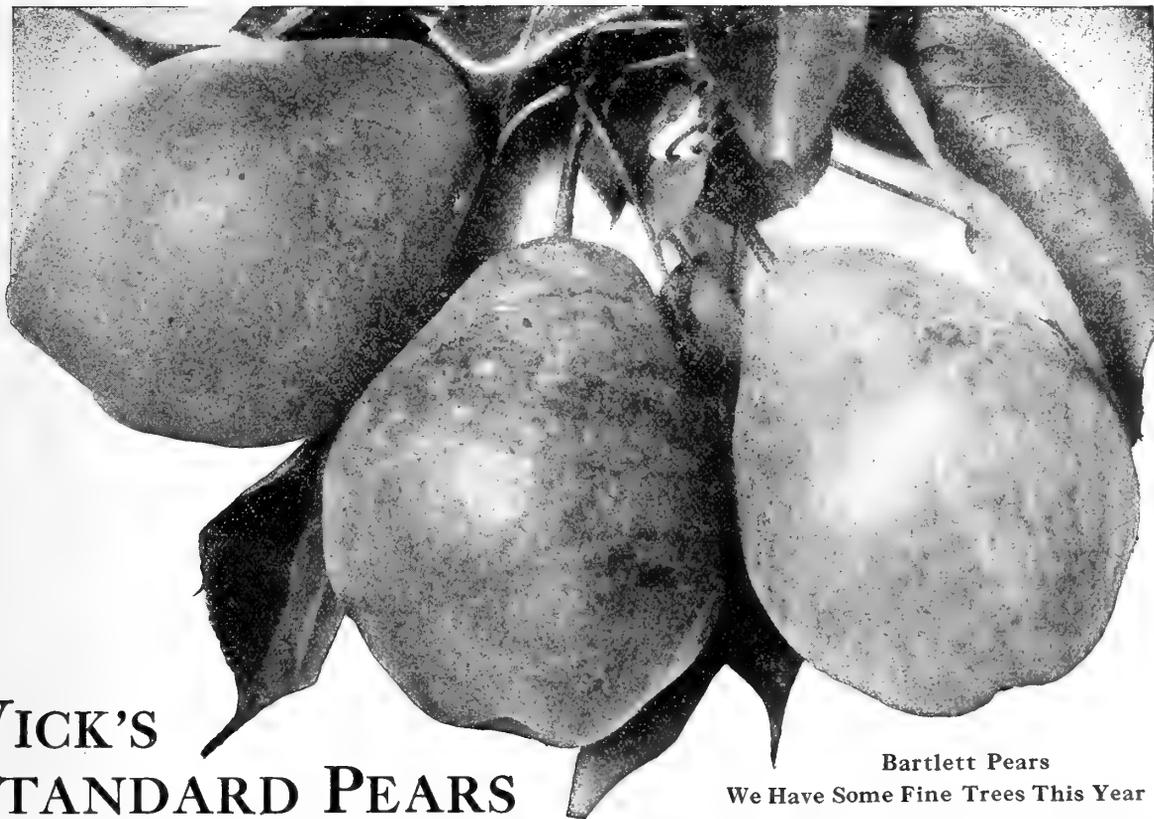

No. 128 West 28th St.

Yours very truly,
Mrs. Annie E. Gardner.

Wonderful.—A large peach very uniform in size and shape. Has a rich golden-yellow color nearly covered with bright crimson. Very handsome and attractive. The flesh is yellow, rich and delicious and very highly flavored. It is firm. The variety has a very small free-around it is red. Wonderful ripens near the middle of October.

Early Elbertas

VICK'S STANDARD PEARS

Bartlett Pears
We Have Some Fine Trees This Year

Pears do best in a strong loam, but succeed well in a variety of soils and on almost any land that will produce good vegetables or grain. There is always a greater demand than supply of Pears of all varieties. Bartlett is, of course, the leading Pear and calls for the highest price in the market. By a careful selection of varieties the Pear season can be extended from July to February. Pear growing has been checked until lately by blight, which has affected this kind of tree, but this condition need not exist in the future. Dr. Waite, a practical Pear specialist, who has done much for the industry in the West, has shown that this blight can be controlled. Bulletins on this subject may be secured from the Department of Agriculture at Washington.

Following is a list of the best known varieties of Pears and prices of each:

PRICES OF PEARS

	Each	10	50	100
XXX Grade, 5 to 7 ft., Extra Size.....	35c	\$3.00	\$13.00	\$25.00
XX Grade, 4 to 5 ft., Orchard Size.....	30c	2.50	10.00	20.00
X Grade, 3 to 4 ft., Smaller Size.....	25c	2.00	8.00	15.00

Anjou (Beurre d'Anjou) (Autumn).—This is one of the most popular and valuable pears one can buy. A large handsome fruit, buttery and melting with a fine vinous flavor. It is a fine keeper and will stay good until mid-winter. The tree is a vigorous grower and a good bearer. Should be picked in the latter part of October or first of November.

Bartlett.—Large; yellow, tinged with red; buttery and melting, with a rich, musky flavor. Bears young and abundantly. Tree vigorous and erect grower; excellent for garden or commercial orchard planting. Is the leader among canning pears, and when well grown is a universal favorite and commands top prices. Will begin to bear in three years, and in about seven years will produce a bushel of fruit per tree. Season, September.

Clapp's Favorite (Summer).—A large, early variety lemon-yellow with red cheek. Flesh fine, juicy, melting and buttery. Hardy, fine grower and very productive. Pick in August or September.

Duchesse d'Angouleme (Autumn).—For many years this pear has been counted among the best and most profitable varieties. Excellent for expert, cold storage, and for every use to which a pear can be put. Strong grower, productive, not subject to blight. Fruit large, light green patched with russet, melting, juicy, sweet and good. October and November.

Flemish Beauty (Autumn).—A large beautiful, melting, sweet pear. Tree very hardy, vigorous and fruitful. Flesh is tender, juicy and highly flavored. Season September and October.

Garber.—Large, bright yellow with red; juicy and good; a splendid canning pear. Resembles Kieffer in vigorous growth, ripens a month earlier, but is a handsomer and better eating pear. Sells well in any market.

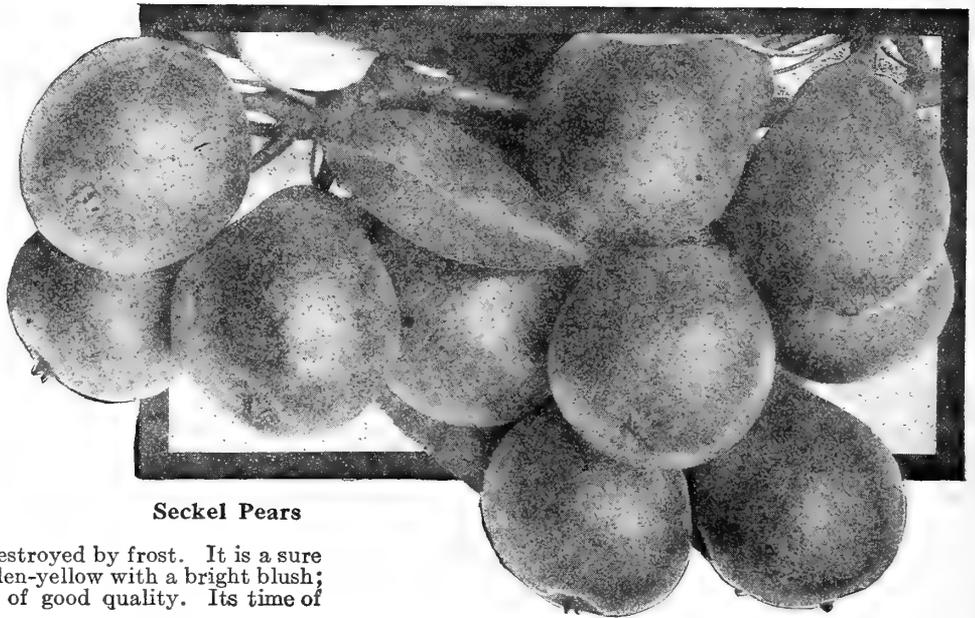

Lawrence.—One of the best and most valuable of Winter pears. It is above medium size, yellow color. Flesh is yellow, tender, juicy and melting. We recommend it very highly to those who want a Mid-Winter variety.

Koonce.—This variety originated in Illinois. The tree is extremely hardy and seldom suffers from blight. It is a very vigorous and upright grower and will do well nearly everywhere. Koonce has been known to bear when all other kinds were destroyed by frost. It is a sure cropper. The fruit is golden-yellow with a bright blush; flesh is juicy and sweet and of good quality. Its time of ripening is July.

Kieffer.—Rivals Bartlett in popularity for commercial orchards. Tree remarkably free from disease, vigorous grower, wonderfully abundant and regular bearer. It has been perhaps the most profitable variety known. Fruit very large when thinned, bell-shaped; golden-yellow when fully ripe; sometimes has a light blush; flesh white, crisp, juicy, of fair quality, exceedingly valuable for cooking and canning, which brings out its spicy flavor. October to December.

Rossney.—Exceedingly large and handsome. Skin is pale yellow with a crimson blush. The flesh is melting, juicy, and has a delicious flavor. The tree is a very strong grower and very hardy. Ripens in October.

Seckel.—The finest pear in cultivation and should never be omitted from the home garden. The richest flavored pear known. Very satisfactory as a dwarf. The small size of the fruit is an objection in some markets, but people are coming to know its excellent quality and the demand is steadily growing. Color brownish-green with reddish cheek. Tree is a good grower and bears heavy crops annually. Season, September and October.

Seckel Pears

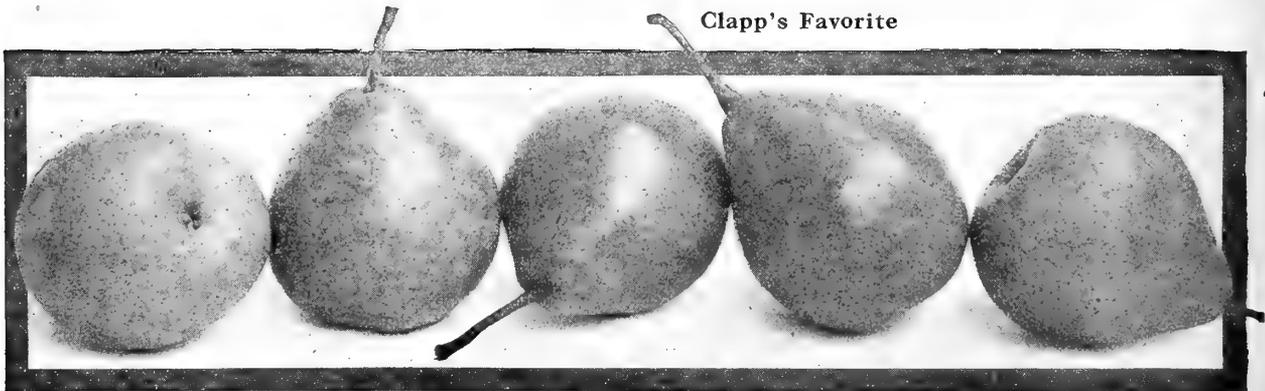

Sheldon.—This is of very large size. It is roundish in shape and has a greenish-yellow color covered with light russet. It is very juicy, melting, and has a tasty flavor. The tree is a fine grower and a good bearer. Season is October and November.

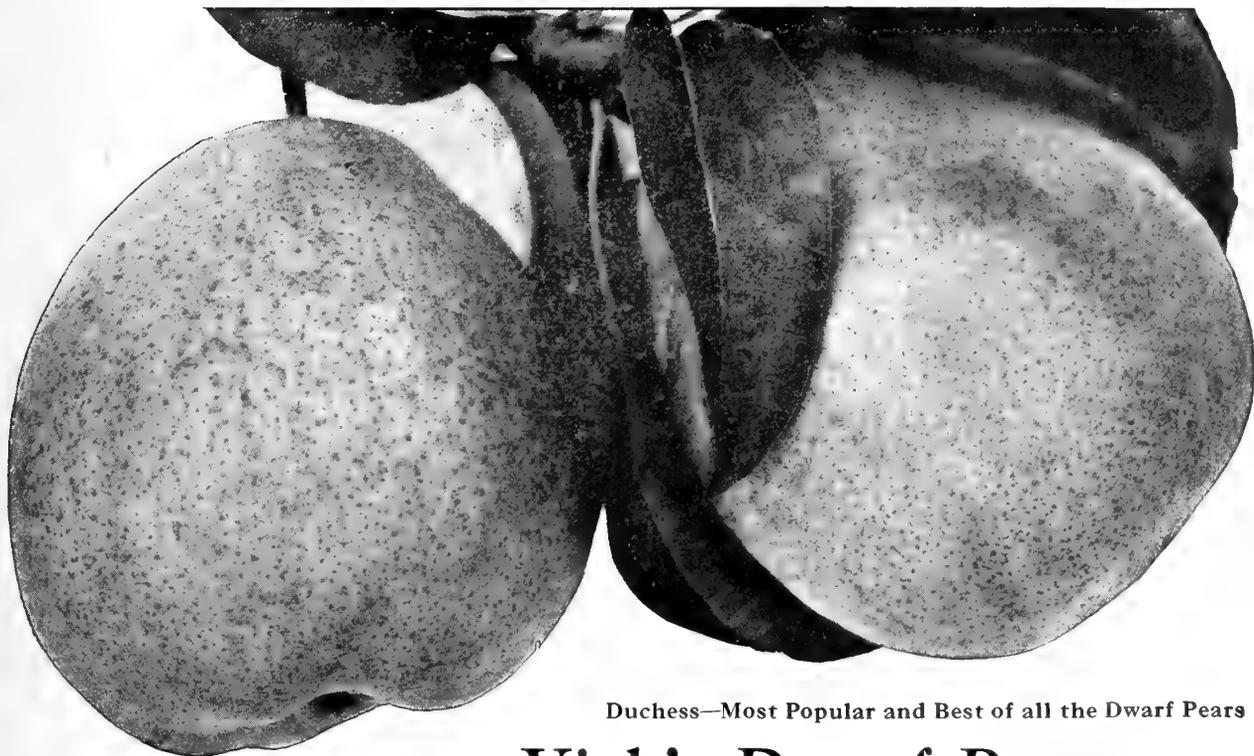

Worden Seckel.—Originated in Oswego County, N. Y. It is a seedling of the Seckel, and is equally as good in quality as that variety and more juicy, with an aroma equally as rich and inviting, while in size, color, form and appearance it is decidedly superior. The color is yellow, with light red on the sunny side. The tree is very hardy and an enormous bearer, and the fruit is ripe just after the Seckel.

Vermont Beauty.—A most desirable pear. The fruit is of medium size, very handsome, being yellow with a bright carmine cheek. The flesh is rich, juicy, aromatic, of the best quality, ripens immediately after the Seckel.

Wilder (Summer).—A valuable early market kind. Form regular, fair size, handsome. Greenish-yellow with red cheek. Flesh sweet, juicy and melting. Tree strong grower and good bearer.

Clapp's Favorite

Duchess—Most Popular and Best of all the Dwarf Pears

Vick's Dwarf Pears

DWARF PEAR TREES.—For the Home Garden as well as for the Commercial Orchard the dwarf pear tree is a great favorite. The tree takes up but little space; the fruit equals in every way that of the standard and because the tree is low growing it is very easy to pick. We recommend the planting of dwarf pear trees especially to our customers who want good fruit and who cannot spare the room necessary for a large tree. Dwarf trees come into bearing young, producing fruit the second or third year. They are hardy, free from blight and very easily grown. A row of these trees planted along a fence or wall will not only act as a screen, but will give you a succession of fruit the entire season.

PRICES OF 2-YEAR-OLD WELL-ROOTED TREES

	Each	10	100
XXX—3 to 4 ft.....	30c	\$2.50	\$20.00
XX—2 to 3 ft.....	25c	2.00	15.00

Duchess.—The most popular of all dwarfs and the one most widely grown. Duchess is a great yielder and a great money getter. The tree is hardy and thrifty and bears uniformly big crops. It is a very early bearer, sometimes fruiting the first season after planting. The fruit is very large, frequently weighing a pound; dull greenish-yellow, spotted with russet; flesh white, rich and of good quality. A very valuable Pear for the home garden or commercial orchard.

Bartlett.—Dwarf Pears are similar to the standard fruit of the same variety, and are very profitable when used as fillers for orchards. Many fruit growers plant Bartlett dwarf as fillers in standard Bartlett and Anjou orchards. In many parts of the country they are planted as fillers in Apple orchards.

Clapp's Favorite.—This is a very good dwarf variety which is used extensively for fillers in orchards, mainly Apple orchards. The one trouble with this pear is that it is susceptible to blight.

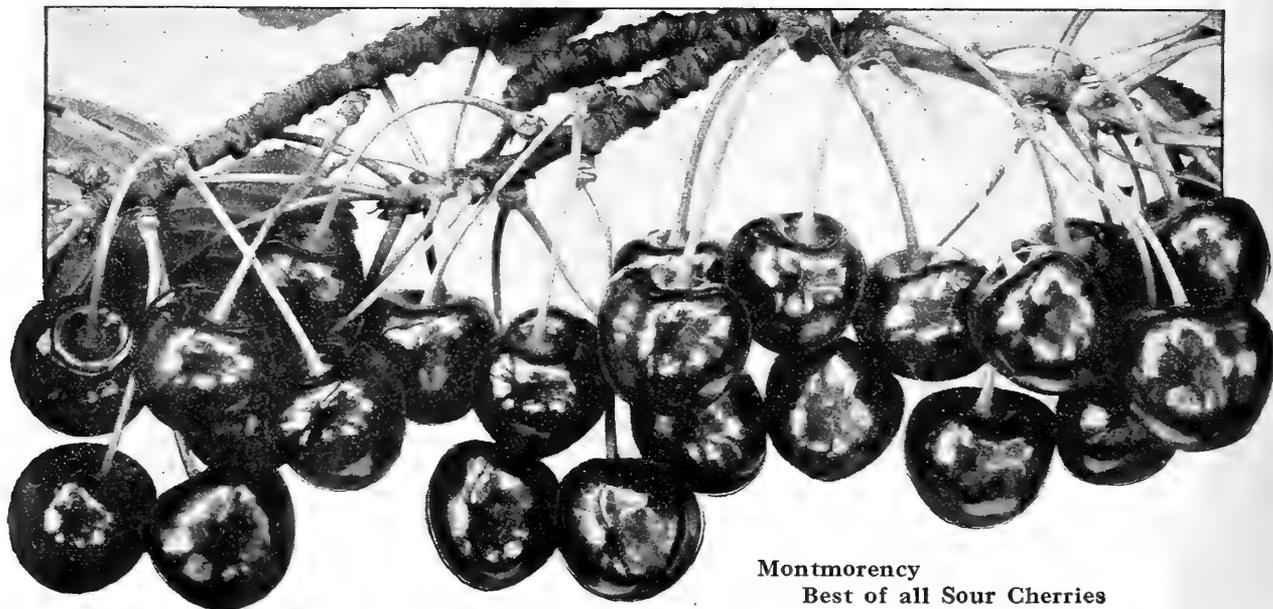

Anjou.—A great money-making dwarf that should be extensively planted. When used as a filler in orchards of standard Anjou and Bartlett it is unexcelled; the dwarfs will have paid for the orchard and more by the time the standard trees are in full bearing. We recommend this highly to our customers.

Howell.—This is an especially fine Pear when grown as a dwarf. It is one of the finest of the American varieties. The fruit is large, pale, waxen-yellow and often has a bright, red cheek. The tree is a good grower and an early bearer. We recommend the Howell on dwarf stock to our customers who may want a good commercial dwarf Pear.

Koonce.—This Pear on dwarf stock fruits the same as on the standard. It is an early Pear, very large in size and has a clear golden-yellow color with a crimson blush. The tree is hardy and vigorous and seldom blights. This is practically a frost-proof variety.

Kieffer.—Same fruit as in the standard variety. Tree is hardy and thrifty. Fruit is very good for canning and is planted extensively for commercial purposes.

Seckel.—This variety is valuable, both as a standard and dwarf. Fruit is the same on either tree. This makes a good filler for an Apple or standard Pear orchard.

Montmorency
Best of all Sour Cherries

VICK'S CHERRY TREES

The cherry is one of the most profitable of all the fruits that are grown. The most important point is to be sure the tree is set in dry or well drained land. No other fruit is so greatly injured by too much moisture as is the cherry. We have divided our list into the Sours or Morellos and Sweets or Hearts.

PRICES OF CHERRY TREES

SOUR VARIETIES

	Each	10	100
XXX Grade, Extra Size.....	35c	\$3.25	\$30.00
XX Grade, Orchard Size.....	30c	2.75	25.00
X Grade, Smaller Size.....	25c	2.25	20.00

SOUR CHERRIES

Dyehouse.—One of the best Sour Cherries for market or home use. The tree is hardy, is an upright grower and always productive. The great quality of this variety is its tendency to hang on the tree after it is ripe. Several varieties that ripen later can be picked before this Dyehouse Cherry drops.

Early Richmond.—Medium size, dark red, melting and juicy, acid flavor; one of the most valuable and popular of the acid cherries and is unsurpassed for cooking; tree slender grower, exceedingly productive and very hardy; will stand the most severe weather.

English Morello.—Medium sized cherry of a very dark red color, sometimes nearly black. It is very acid in flavor, the flesh is of good quality and it makes a fine canner. Tree is a small grower with light limbs and trunk. Ripens in July.

Montmorency.—Best of all cherries. It is hardy, reliable and productive. In great demand by canning factories. More money has been made with it than with any other variety. Large, bright shining red, acid, mid-season. June.

Ostheim.—Has been tested in the severest winters of Minnesota and found to be perfectly hardy. The fruit

SWEET VARIETIES

	Each	10	100
XXX Grade, Extra Size.....	40c	\$4.00
XX Grade, Orchard Size.....	35c	3.50
X Grade, Smaller Size.....	30c	3.00

is large and roundish. Flesh is liver colored, tender, juicy, and almost sweet, although a sub-acid cherry. Quality is fine. Ripens about the middle of July.

SWEET CHERRIES

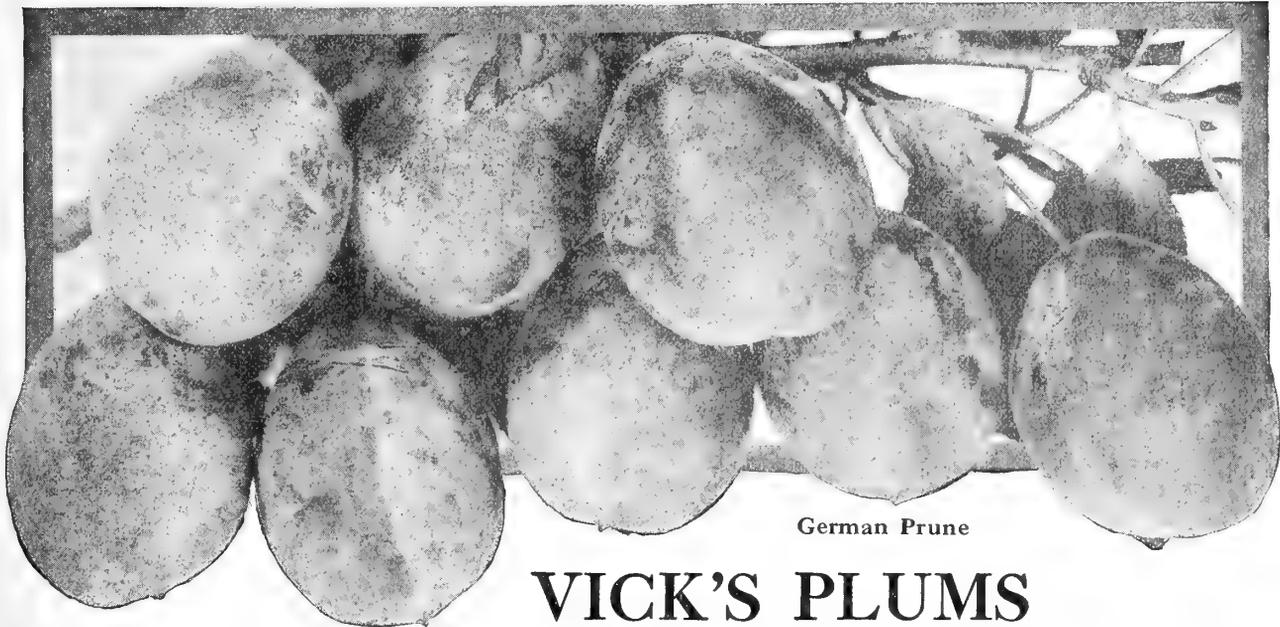

Black Tartarian.—This is a large, black, heart-shaped, tender, juicy, Sweet Cherry of surpassing quality. The tree is an upright, dense grower, remarkably vigorous and a regular bearer of immense crops. Fruit ripens last of June or first of July.

Bing.—This is one of the most delicious Sweet Cherries that you can grow. The tree is very hardy and vigorous and has heavy foliage. It succeeds in the East better than most sweets. Fruit is large, dark brown or black and of very fine quality.

Lambert Cherry.—One of the largest of all sweet cherries. Color dark red; flesh solid; an excellent shipper.

Governor Wood.—Very large, rich; light yellow with red cheek; juicy and sweet. One of the very best. Late in June.

Napoleon.—A magnificent cherry of the largest size; pale yellow with a bright red cheek; very firm, juicy and sweet. Bears enormous crops; ripens late; valuable for canning.

German Prune

VICK'S PLUMS

The Plum does best on a strong, clay soil, dry and well drained. Here it grows the most thriftily and with cultivation suffers least from "Curculio" or "Black Knot." There is little trouble in keeping the trees free from insects and disease. After the blossoms have fallen spread a sheet on the ground under the tree. Then jar the tree so as to shake down the stung fruit and insects. These should be burned. This should be done every day for a week or more and it is important that it is done early in the morning.

PRICES OF PLUM TREES
Strong 2-Year Well-Rooted Stock

	Each	10	50	100
XXX Grade, 5 to 6 ft.	35c	\$3.00	\$13.00	\$25.00
XX Grade, 4 to 5 ft.	30c	2.50	10.00	20.00
X Grade, 3 to 4 ft.	25c	2.00	8.00	15.00

Abundance (Japan).—Large and beautiful; amber, turning to a rich, bright cherry; flesh light yellow, juicy, tender, sweet, exceedingly productive. Season very early.

Bradshaw.—Very large, dark violet-red, with a blue bloom; flesh yellow, juicy and good; very productive. A good seller and valuable. August 10 to 20.

Burbank (Japan).—Large and beautiful; clear cherry red; an abundant bearer; valuable market variety. Ripens early in September.

German Prune.—Fruit long, oval, purple with a thick bloom; flesh firm, sweet and pleasant, separating freely from the stone; moderate growth. A great favorite. A sure market for all you have to sell at very profitable prices. September.

Lombard Plum.—Lombard is a great favorite. The tree adapts itself to any locality. Hardy, producing good crops where many others will not grow; it is exceedingly productive. It is a handsome reddish plum, flesh yellow, juicy and pleasant. An excellent variety, and should be planted in all gardens and orchards.

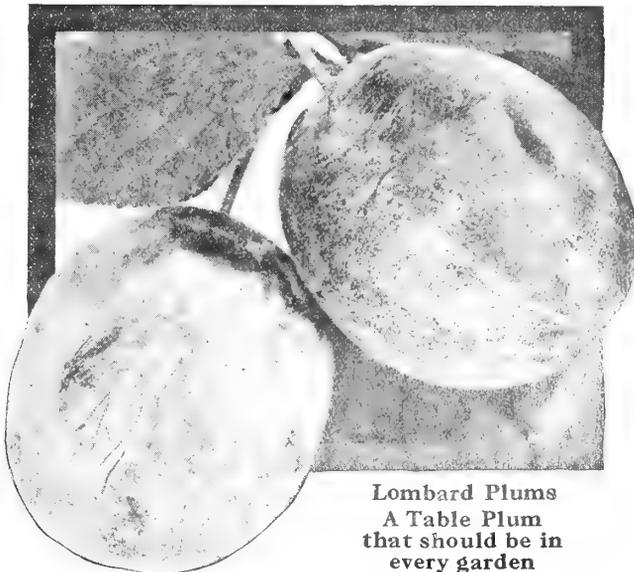

Red June (Japan).—A vigorous, hardy, upright spreading tree, as productive as Abundance; fruit medium to large, deep vermilion-red, with handsome bloom, very showy; flesh light lemon-yellow, slightly sub-acid, of good and pleasant quality; half cling; pit small. Of immense value for its very early ripening.

Reine Claude (Bavay's Green Gage).—Very large, greenish, fine flavor. Not surpassed in quality, beauty or size. September.

Shipper's Pride.—Large, dark purple, very showy, often measuring two inches in diameter; fine, juicy and sweet. A beautiful and valuable variety. September.

Shropshire Damson.—An English variety of plum and very fine for preserving. It is a roundish blue fruit and always sells well; the tree is hardy and very prolific. Fruit ripens in October.

York State Prune.—A large size prune of dark blue color, covered with purple blush; flesh is yellow and delicious; freestone. Ripens last week in September. A valuable prune both for home and commercial use.

Lombard Plums
 A Table Plum
 that should be in
 every garden

VICK'S APRICOTS

It is surprising how many people there are who do not know how very delicious Apricots are. Here is a beautiful, rich, golden-yellow fleshed fruit, firm, sub-acid and of extremely fine flavor. The tree is hardy and will grow wherever peaches will.

The care and cultivation of the Apricot are the same as for the peach, and the trees are just as productive, ripening as they do just after Cherries and before the earliest peaches. This fruit should be planted more extensively, both for the Home Garden and for commercial purposes. The varieties we list are all good.

PRICE OF APRICOT TREES—35c. Each, \$3.00 for Ten

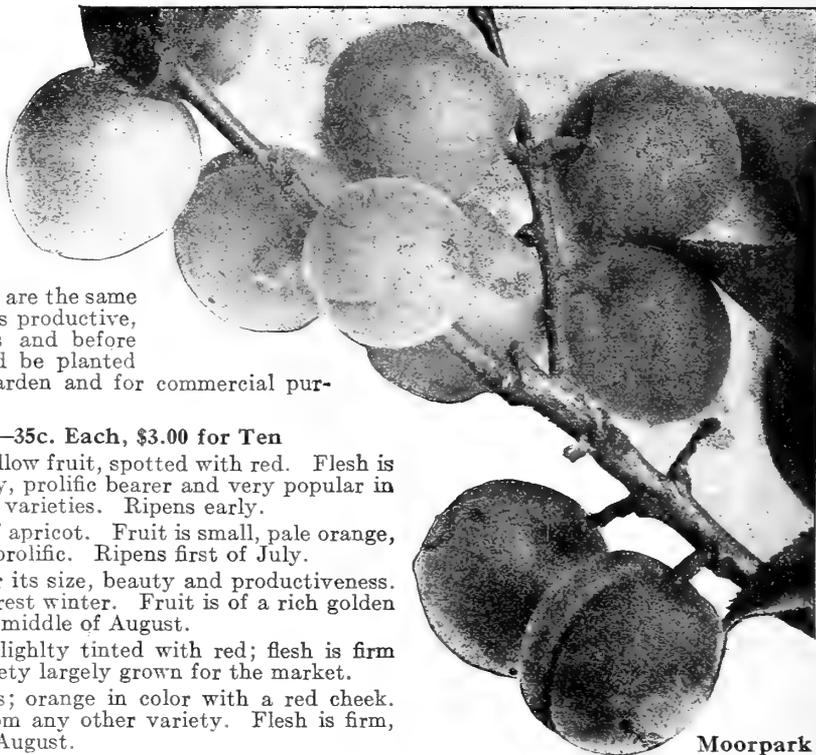

Alexander.—A large, oblong, orange-yellow fruit, spotted with red. Flesh is sweet, juicy and very good. It is a hardy, prolific bearer and very popular in the east. One of the best of the Russian varieties. Ripens early.

Early Golden.—An American variety of apricot. Fruit is small, pale orange, juicy and sweet. The tree is hardy and prolific. Ripens first of July.

Harris.—This variety is remarkable for its size, beauty and productiveness. It is extremely hardy, will stand the severest winter. Fruit is of a rich golden color and of very fair quality. Ripens in middle of August.

Montgamet.—A pale yellow apricot, slightly tinted with red; flesh is firm juicy and agreeably acid. A popular variety largely grown for the market.

Moorpark.—The largest of all apricots; orange in color with a red cheek. More money is made from these than from any other variety. Flesh is firm, juicy and very fine. Moorpark ripens in August.

Moorpark

VICK'S NUT TREES

The past few years have witnessed a remarkable development in the planting of nut-bearing trees. Probably no branch of tree cultivation pays larger profits or is as well assured of a profitable market. The immense importations of foreign nuts every year give some idea of the market to be supplied. Few farms but contain land, that, if planted to nut-bearing trees, would pay better than anything else to which it could be devoted; the nuts in many cases paying better than farm crops or fruits, while most kinds are making a growth of valuable timber, that will of itself pay a large per cent. on the investment.

American Sweet Chestnut.—A well known forest and nut-bearing tree; of great value for ornamental purposes. 50 cts. each, \$4.50 for 10.

Black Walnut.—The well known native species; hardy, prolific and valuable; durability of timber unexcelled. 50 cts. each, \$4.50 for 10.

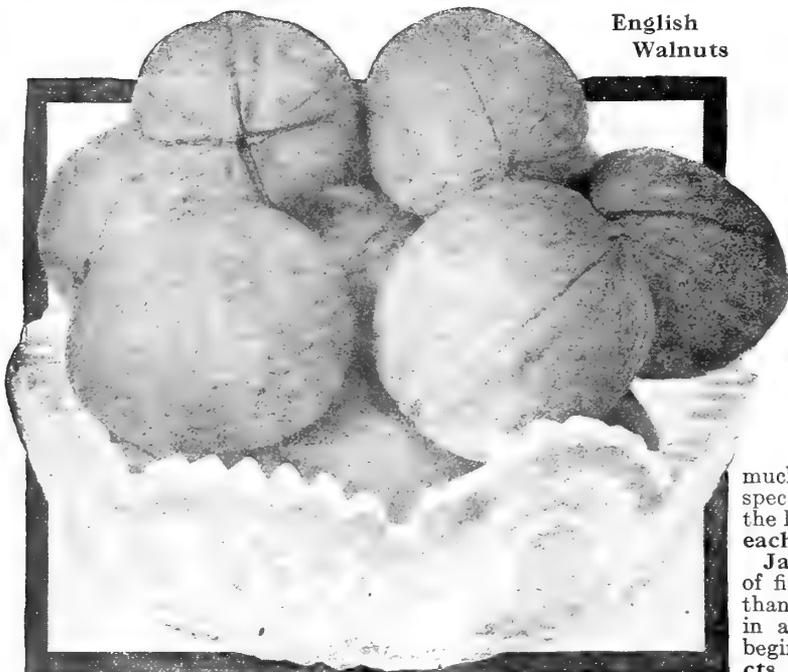

Butternut.—A fine native tree producing a large longish nut which is prized for its sweet, oily, nutritious kernel. 50 cts. each, \$4.50 for 10.

Chestnut, Japan.—Very distinct from all other Chestnuts, dwarf grower, hardy, productive, usually producing Nuts when two or three years old. Nuts of immense size, far surpassing all other kinds; of fair quality. Decidedly ornamental. 4 to 5 ft., 50 cts. each; \$5.00 per dozen.

English Walnut.—The fruit of this being so much larger and better flavored than our native species, gives it the preference for cultivation over the latter in localities where it will succeed. 50 cts. each, \$4.50 for 10.

Japan, Walnut.—The nuts are borne in clusters of fifteen to twenty. The shell is a little thicker than that of the English Walnut, which it resembles in a general way. Butternut flavor. The trees begin to bear when two or three years old. 50 cts. each, \$4.50 for 10.

English
Walnuts

St. Regis Everbearing Raspberry—

Ripe Fruit from JUNE to NOVEMBER

ST. REGIS RASPBERRY

The only variety of Raspberry that gives a crop the first year the plants are set out, and two crops every year afterward.

St. Regis begins to ripen in June and continues to bear fruit until frost. Truly an Everlasting Red Raspberry. The berries are large, bright crimson, of the highest quality. Rich and sugary with a full, true Raspberry flavor. Meat is solid, making the berry a fine shipper. In size of fruit, productiveness and quality, to say nothing of its being Everbearing, St. Regis leads all other reds.

The canes of St. Regis are stocky and of strong growth. Plants absolutely hardy, enduring the severest cold uninjured. This is a great berry to plant in the Home Garden or in the field for the market. It cannot be equaled as a table fruit. We have some mighty fine plants this year that will please you very much.

Price—10 cts. each, 25 cts. for 3, 75 cts. for 10, \$3.50 for 100, \$25.00 for 1,000.

JUNE RED RASPBERRY

**Ripens in June when Berries Bring the
Highest Prices on the Market.**

The best and most profitable Raspberry ever offered to the Market Grower as it ripens earlier than any other variety. A grower says: "We had our first picking June 20th, 14 days ahead of Cuthbert, and were able to make four pickings while the market for 'Reds' was 15 cents per pint, by the crate."

St. Regis or
Ranere

Think what this means to Fruit Growers! 15 cents per pint or \$9.60 per crate. Where will you find another Raspberry that will show returns like this?

June is larger than Cuthbert and holds up in size unusually well throughout the entire season. The plants are vigorous and strong growers. Canes are stocky, upright, almost smooth and very hardy. June makes but a very few suckers.

Here is what the Geneva Experimental Station of New York State, where "June" originated, says about it in Bulletin No. 364: "June has now been tested long enough in different parts of New York to fully determine its value. The yield is heavy and well distributed over a long season, which begins the earliest of any of the seventy varieties growing at this station. The fruit resembles Loudon in color, a bright, handsome red, and averages larger than Cuthbert but is more spherical. June ships and holds up in size unusually well throughout the season. Last, but by no means least, June is of high quality. We expect to see this variety become one of the most profitable red Raspberries grown."

Order your plants early. Price, 15 cents each; 25 cts. for 2; \$1.00 for 10; \$5.50 for 100; \$50.00 for 1,000.

Here are two mighty fine red raspberries for the Man who grows for market or for the Home Garden. You can't go wrong on either.

Cuthbert Red Raspberry

"Queen of the Market"

The Most Popular Red Raspberry with the Market Grower

CUTHBERT—
"Queen of the Market"

Cuthbert.—This is the best of all Red Raspberries for the market; not only on account of its fine shipping qualities, but for its size, color, quality and richness of flavor. The plant is a very strong grower with vigorous healthy foliage and very hardy. Cuthbert is one of the reliable varieties that can always be depended on to bear a good crop of berries.

Herbert.—A fairly new berry coming from Canada. Its chief quality is its extreme hardiness, and its being practically proof against diseases of all kinds. The fruit is large, bright to deep red, of fine quality and flavor. It is a very fine market variety especially adapted to growing in localities where the winters are very cold. Highly recommended by the Government Experimental Station at Ottawa.

Welton, Arizona, April 23, 1915.

JAMES VICK'S SONS,

Gentlemen:—The raspberry roots arrived in good condition. Thanks for the extras.

Respectfully,

MRS. L. F. PROEBSTEL.

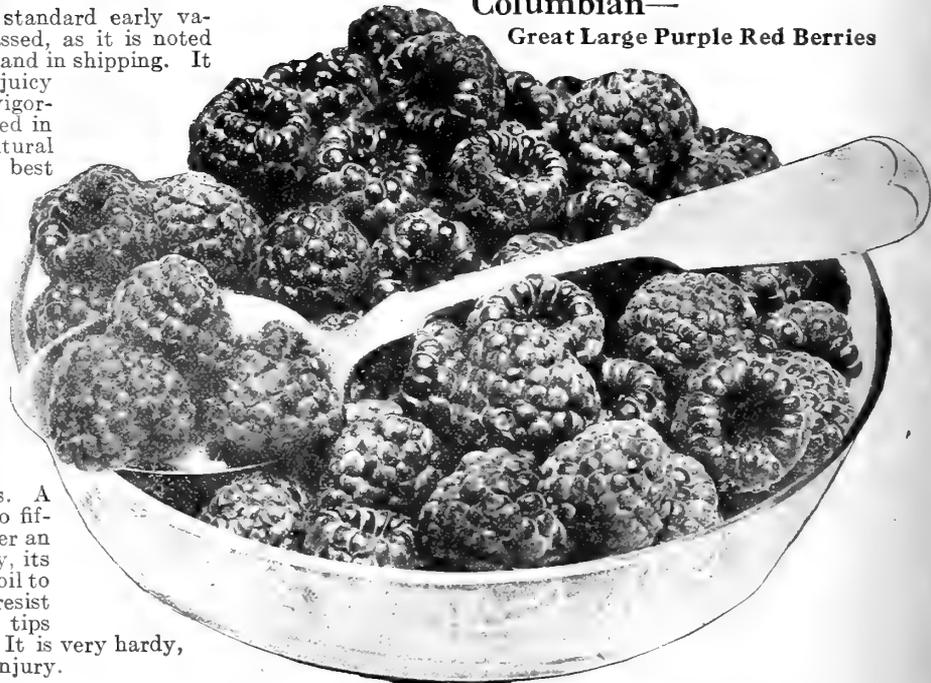

Golden Queen.—Yellow. Undoubtedly the best of the yellow varieties, and the fact that it is a seedling of the Cuthbert is a strong recommendation within itself. It is very productive and hardy; the berries are large in size, beautiful pale yellow in color and excellent in quality; medium to late and continues a long time in bearing.

Marlboro.—Red. This is the standard early variety. As a shipper it is unsurpassed, as it is noted for its firmness both on the bushes and in shipping. It is productive of large, crimson, juicy berries. The bush is an upright, vigorous plant. It is greatly appreciated in New Jersey. The Colorado Agricultural Experiment Station says: "The best red variety for Colorado." The Cornell station and the Maryland station give good reports of it.

Columbian.—Very large, often an inch in diameter; dark red, bordering on purple, adheres firmly to stem and will dry on the bush if not picked; of rich, sprightly flavor, the best for canning or evaporating, and probably the most productive of all raspberries. A most vigorous grower, canes ten to fifteen feet in length and often over an inch in diameter, strong and woody, its roots spreading, and penetrate the soil to a great depth, thus enabling it to resist drought. It propagates from the tips and never suckers from the roots. It is very hardy, enduring 28° below zero without injury.

Columbian—

Great Large Purple Red Berries

Prices on Cuthbert, Columbian, Marlboro—25c for 4; 50c for 10; \$2.00 for 100; \$15.00 for 1000.

" " Herbert and Golden Queen—25c for 3; 60c for 10; \$3.50 for 100; \$30.00 for 1000.

Add two cents to the price of each plant if you want raspberries or blackberries sent to you by Parcel Post. This is very important.

Black Raspberries

Plum Farmer.—The Plum Farmer Black Raspberry is, in our estimation, the best early Blackcap for home and market ever introduced. It ripens early. Berries are very large, thick meated, juicy and sweet. They pick very easily, and stand up and carry well. In quality, firmness and productiveness, it is all that can be desired either by wholesale growers or for the home garden.

"The plants are hardy, vigorous and productive; the berries large, good in color and quality. It has already been grown in some localities, and reports of its behavior are very favorable. It certainly should be given a trial in all commercial plantations."—Report of Geneva Experimental Station.

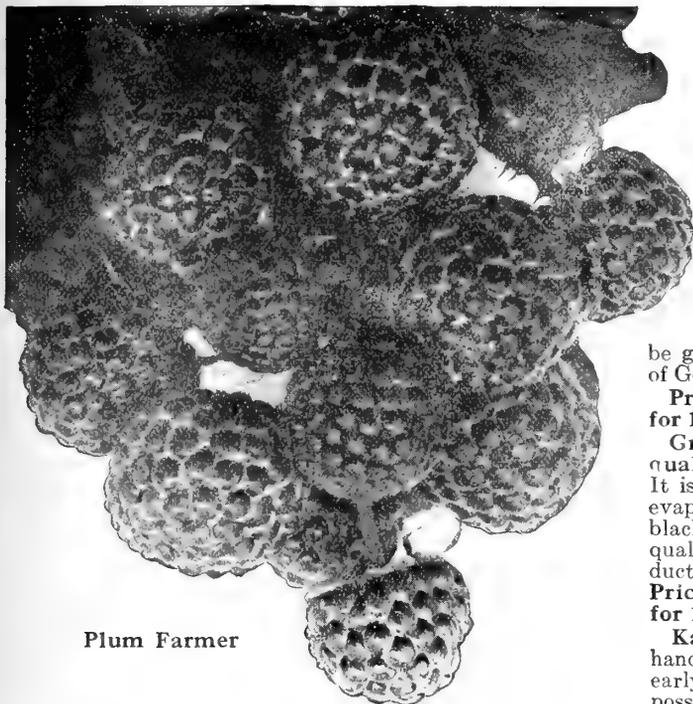

Price—25 cts. for 3, 60 cts. for 10, \$2.00 for 100, \$15.00 for 1,000.

Gregg.—A late fruiting black raspberry of fine quality. This is one of the best known late Raspberries. It is a very good shipper and is an excellent variety for evaporating. Berries are very large, regular, glossy black with grayish bloom, quite firm, sweet and of best quality. Season is late and extended. It is very productive and has proved itself quite a valuable variety. Price—25 cts. for 3, 60 cts. for 10, \$2.00 for 100, \$15.00 for 1,000.

Kansas.—The fruit is nearly as large as the Gregg; handsome, firm and of fine quality. For a good second-early Raspberry there is nothing better than this. It possesses all the valuable attributes of a profitable market sort, and its large size and attractive appearance insure ready sales at good prices. Prices—25 cts. for 3, 50 cts. for 10, \$2.00 for 100, \$12.00 for 1,000.

Corfu, N. Y., May 4, 1916.

JAMES VICK'S SONS,
Gentlemen:—Received the 100 Berry Plants O. K. It is fine stock and I know it will make good.
Respectfully yours,
CHAS. B. JOHNSON.

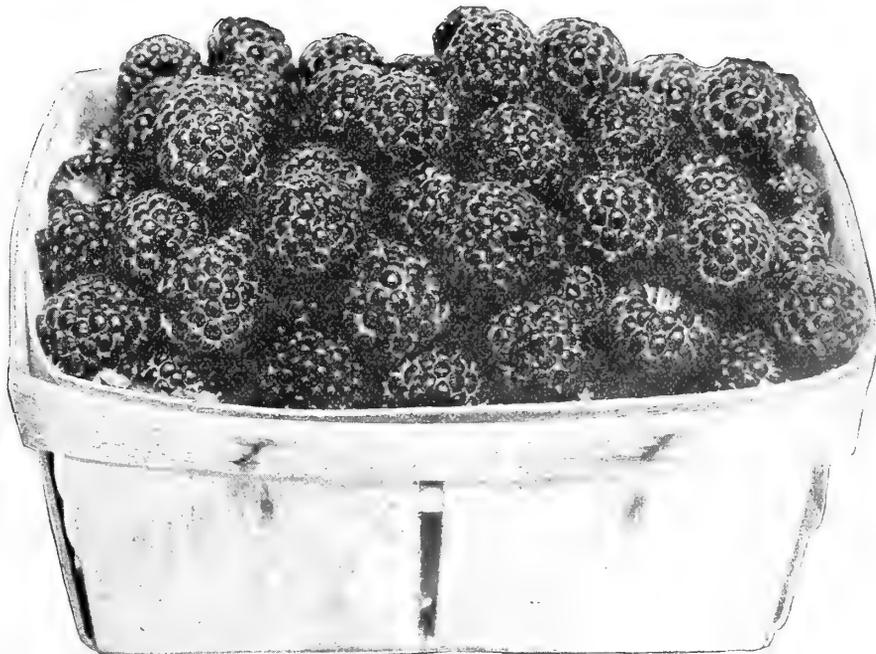

Plum Farmer

Cumberland.—Fine, large berries, ripening in mid-season. This is the largest of the Raspberry family, surpassing that of any other variety that we know of, often measuring $\frac{3}{8}$ inch in diameter; sweet, firm, of good quality, and is of such handsome appearance that it is sure to bring the top of the market. The bush is healthy and vigorous, throwing out stout canes in abundance; it is in every way one of the best blackcaps. Its season is medium early, and it is unexcelled in hardiness and productiveness. Price—25 cts. for 3, 60 cts. for 10, \$2.00 for 100, \$15.00 for 1,000.

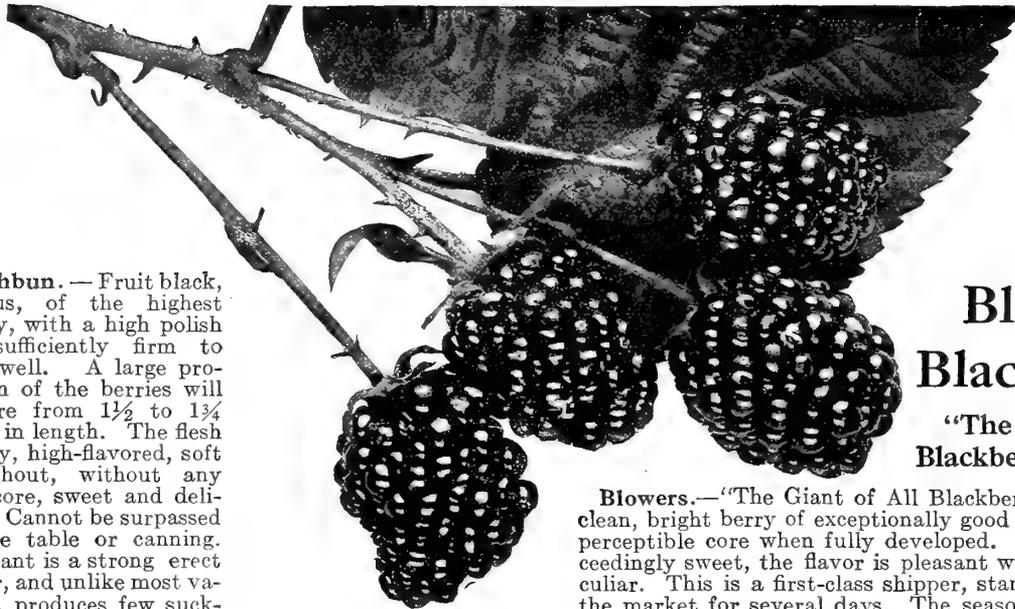

Black Diamond.—One of the best for home and market use. For drying and evaporating it excels all others. The fruit is large and handsome, and on account of its good size, good keeping qualities and its productiveness, is one of the most profitable to grow. Very sweet and excellent. Price—25 cts. for 3, 60 cts. for 10, \$2.00 for 100, \$15.00 for 1,000.

Raspberries and Blackberries.

Raspberries and Blackberries should be planted in good soil and kept well cultivated. The old canes should be cut out each year early in the spring, and the new canes pinched off when they are three feet high. If the ground where they are planted is at all exposed, the plants should be well protected by making a mound of earth around the stalks and bending the canes over the mound and pegging them down during the winter.

Black Diamond

Blowers

Blower Blackberry

"The Giant of all
Blackberries"

Rathbun.—Fruit black, luscious, of the highest quality, with a high polish and sufficiently firm to carry well. A large proportion of the berries will measure from $1\frac{1}{2}$ to $1\frac{3}{4}$ inches in length. The flesh is juicy, high-flavored, soft throughout, without any hard core, sweet and delicious. Cannot be surpassed for the table or canning. The plant is a strong erect grower, and unlike most varieties, produces few suckers, but roots from tips like raspberries. It is hardy, having sustained a temperature of 15 to 18 degrees below zero without harm; vigorous, great bearer. By mid-summer pruning it can be trained in tree form. **Price—25 cts. for 4, 50 cts. for 10, \$3.00 for 100, \$19.00 for 1,000.**

Milwaukee, Wis., Nov. 14, 1916.
883 26th St.

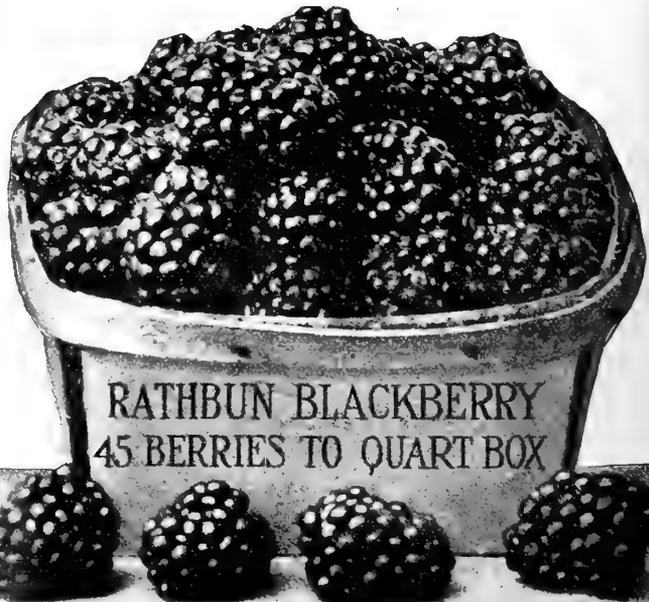

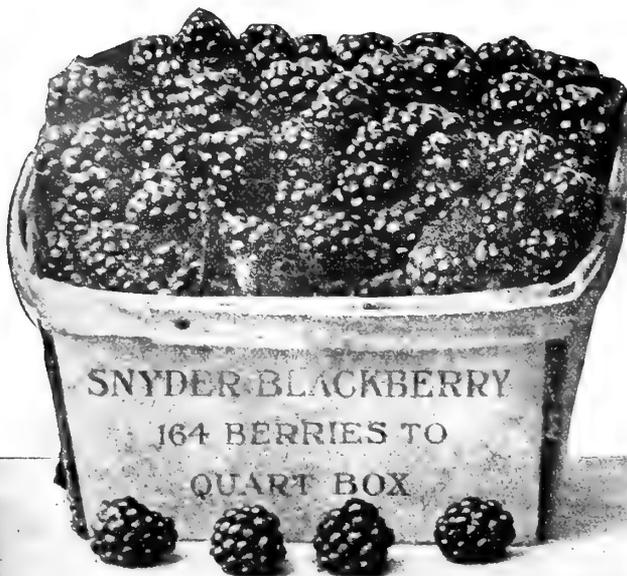

NURSERY DEPT.

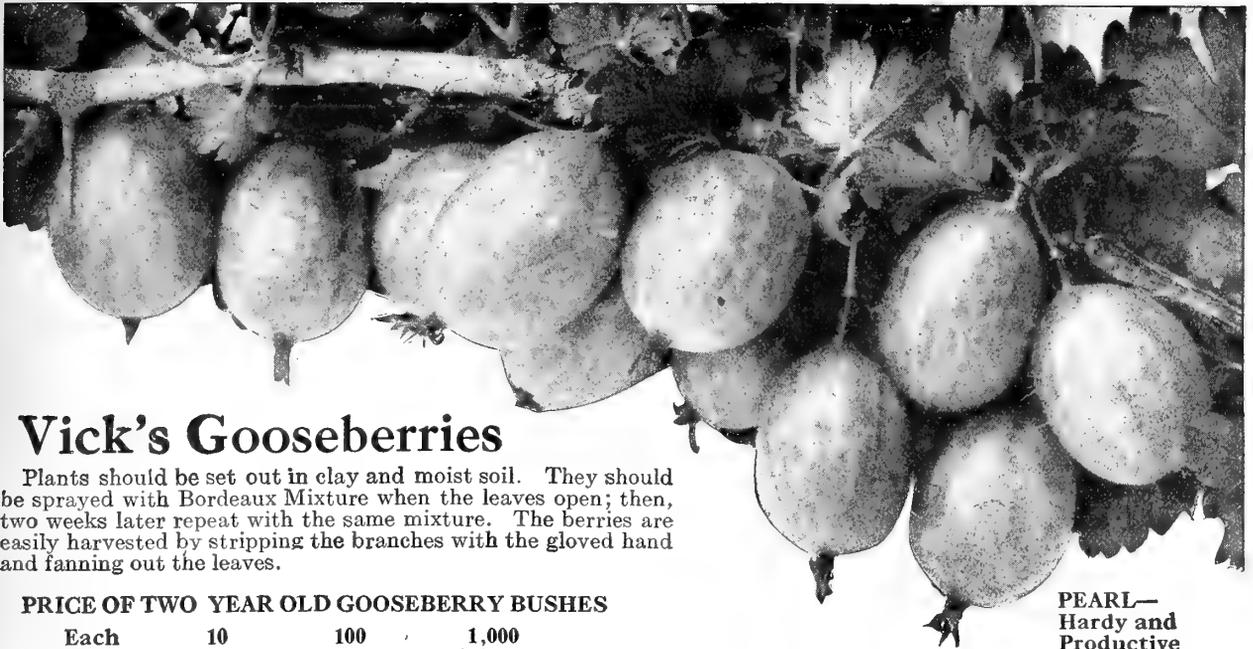

Gentlemen:—Beg to acknowledge receipt of the Plum Farmer raspberry plants as per your letter November 11th.—this day. Same arrived in perfect condition. They certainly are dandies. **MRS. L. STROEBEL.**

Eldorado.—A berry you can depend on every time. The vines are very vigorous and extra hardy. Berries are large, black and borne in big clusters. **Price—25 cts. for 3, 60 cts. for 10, \$3.00 for 100, \$20.00 for 1,000.**

Blowers.—"The Giant of All Blackberries." A large, clean, bright berry of exceptionally good quality, with no perceptible core when fully developed. The fruit is exceedingly sweet, the flavor is pleasant without being peculiar. This is a first-class shipper, standing up well in the market for several days. The season of ripening is from the middle of July until frost, with the bulk of the crop maturing in the month of August. It is a hardy variety. It has endured 20 degrees below zero. The bushes are upright growers, are very hardy and enormously productive. One single plant has the record of producing 2,000 berries. **25 cts. for 3, 65 cts. for 10, \$3.50 for 100.**

Lucretia Dewberry.—A low-growing, trailing blackberry. Hardy, and very productive with fine foliage and white flowers. The fruit ripens early; is many times one and one-half inches long by one inch in diameter. Soft, sweet and luscious. Free from hard cord. Ripens before late raspberries are gone. Should be mulched to keep berries off from soil. **25 cts. for 3, 65 cts. for 10, \$3.50 for 100.**

Vick's Gooseberries

Plants should be set out in clay and moist soil. They should be sprayed with Bordeaux Mixture when the leaves open; then, two weeks later repeat with the same mixture. The berries are easily harvested by stripping the branches with the gloved hand and fanning out the leaves.

PRICE OF TWO YEAR OLD GOOSEBERRY BUSHES

Each	10	100	1,000
\$0.20	\$1.50	\$10.00	\$80.00

Downing.—A large, handsome, pale green berry of splendid quality. Popular for cooking and table use. A vigorous grower and proof against mildew.

Pearl.—This variety bears a great resemblance to the Downing. It is very hardy; free from mildew; superior in size and quality. The fruit is pale green—fine for cooking

**PEARL—
Hardy and
Productive**

and table use. Pearl is the most productive of all Gooseberries, a variety that does well in Canada.

Josselyn (Red Jacket).—Bush a strong grower and very productive; less subject to mildew than others. Fruit red, very large, smooth, of good flavor; bush absolutely hardy, with clean, healthy foliage. The one large red gooseberry that can be planted with confidence.

Vick's Strawberry Rhubarb

Rhubarb is probably the most useful and popular of all garden plants and is grown more extensively than all others. Hardly a garden is without a few roots that easily keep the table supplied with sauces, pies and preserves. In this Strawberry Rhubarb or Pie Plant as it is called, we have a variety whose stalk is a beautiful Strawberry red or pink all the way through. It is not a green variety, but a true Strawberry color. The plant is extremely tender, fine flavored and juicy. Away ahead of other kinds for making pies and sauces.

Plant some roots in your garden. We have some fine two-year-old stock to sell this year that we know will please you.

Price—15 cts. each, 2 for 25 cts., 5 for 50 cts. Add 3 cents per root for postage.

What You Can Do with Strawberry Rhubarb

- Rhubarb conserve with oranges.
- Rhubarb, red raspberry, red currant preserves.
- Rhubarb and strawberry preserves, sauce, pie.
- Rhubarb and elderberry preserves, sauce, pie.
- Rhubarb and plums with cinnamon and cloves sweetened, sauce, preserves, pies.
- Rhubarb custard.
- Rhubarb tapioca pudding.
- Rhubarb sauce.
- Rhubarb baked.
- Rhubarb pies.
- Rhubarb cake.
- Rhubarb tarts.

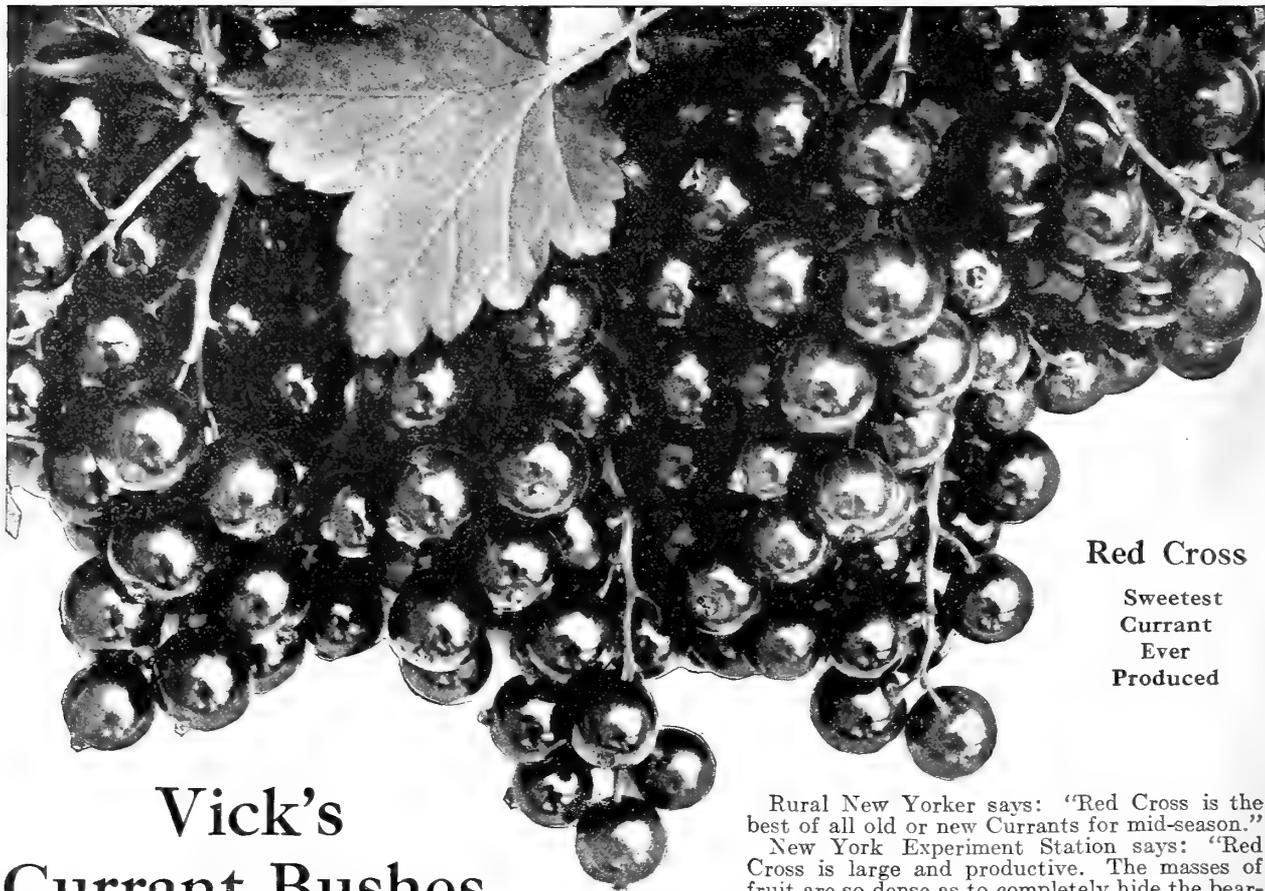

Rhubarb Tapioca Pudding

This is made by cutting up about a quart of Early Strawberry into small pieces. Cook in one pint of sugar in a double boiler or saucepan until tender. Do not stir. Skim rhubarb out carefully and put in baking dish. To the syrup left in boiler add enough water to make one quart; when boiling add $\frac{3}{4}$ cup of pearl tapioca. Boil one hour, pour over rhubarb, add one tablespoon of butter and bake in oven $\frac{1}{2}$ hour. Serve with cream or foamy sauce.

Rhubarb and Plum Preserve

To make in large quantities use: 12 bunches Strawberry rhubarb, $\frac{1}{2}$ bushel plums. Cook with cinnamon and cloves. Sweeten to taste.

Not only does Strawberry Rhubarb cook much better in sauces and pies than other kinds, but it looks and tastes better. It has the strawberry color.

Red Cross

**Sweetest
Currant
Ever
Produced**

**Vick's
Currant Bushes**

The Currant ripens just before Raspberries are gone, continuing in prime order for several weeks. It is of pleasant acid flavor, hardy, a free grower, easy to cultivate, and a certain and heavy cropper. Because of its hardiness and free growing tendencies, it is often neglected, but good cultivation and careful pruning will double the size and quality of the fruit and increase the profits. Currants are the most profitable of smaller fruits. An acre yields from 200 to 250 bushels of fruit. Plants should be set in rows four feet each way, allowing plenty of light and air. For protection against the currant worm, dust a little hellebore powder over the bushes when the leaves are damp. Do this as soon as worms appear.

Red Cross.—It is natural to connect sourness with all red currants, since, as a rule, red currants are exceedingly acid, but Red Cross currant is an exception to the ordinary rule, being the sweetest currant ever produced. We know of no more appetizing or healthful dish than a dish of Red Cross currants at the table to be eaten the same as strawberries or other sweet fruit. This qualification of sweetness and palatableness has not been properly emphasized. In making currant jellies, or in preparing currants in other ways, remember the Red Cross currant requires only half the sugar that many other currants require owing to its natural sweetness and fine flavor. Prices, 15 cts. each, \$1.00 for 10, \$6.50 for 100, \$50.00 for 1,000.

Rural New Yorker says: "Red Cross is the best of all old or new Currants for mid-season."
New York Experiment Station says: "Red Cross is large and productive. The masses of fruit are so dense as to completely hide the bearing canes from view."

Wilder.—Ripens the same time as Fay's Prolific, and hangs on the bush much longer; fully as prolific and is in every way as profitable. A popular variety both for the table and market. It is one of the strongest growers and one of the most productive varieties on our list. Bunches and berries large, bright and attractive red even when dead ripe. Hangs on the bushes in fine condition for handling as late as any known variety. Price—10 cts. each; 80 cts. for 10, \$6.00 for 100, \$45.00 for 1,000.

Victoria.—A late bearing red variety. Berries are large and grow in very long bunches. Victoria is a fine bearer and is grown for commercial purposes in many parts of the country. Price—10 cts. each, 12 for 75 cts., \$3.50 for 100, \$30.00 for 1,000.

If you wish your small fruit plants sent by Parcel Post, add 2 cents for each plant or 15 cents for every 10 plants.

Sherborn, Mass., May 5, 1916.

JAMES VICK'S SONS,

Dear Sirs:—My order No. 23477 came safely to hand today. The currant bushes are much larger and finer than I expected and I am very much pleased with them. They average more than twice as large as some that I paid a traveling agent 25 cts. each for. No more agents for me.

Very truly yours, E. J. SMITH.

PERFECTION CURRANT

Perfection.—A large red currant, mild, sub-acid flavor. Plenty of pulp and few seeds. Less acid and of better quality than any other currant. Very productive. Endorsed by N. Y. State Experimental Station. Winner of Barry Gold Medal, Pan-American Exposition Medal and St. Louis Exposition Gold Medal. Price—20 cts. each, \$1.75 for 10, \$12.00 for 100.

Cherry.—Large red berries, borne in fair-length clusters. A robust, fruitful and standard variety that we believe has been set more largely in commercial orchards than any other sort. Price—10 cts. each, 80 cts. for 10, \$7.00 for 100. \$50.00 for 1,000.

Fay's Prolific.—Less acid than Cherry; branches large, berries medium, bright and sparkling. One of the leading late varieties, and a remarkable cropper. Valuable for commercial purposes as well as for home use.

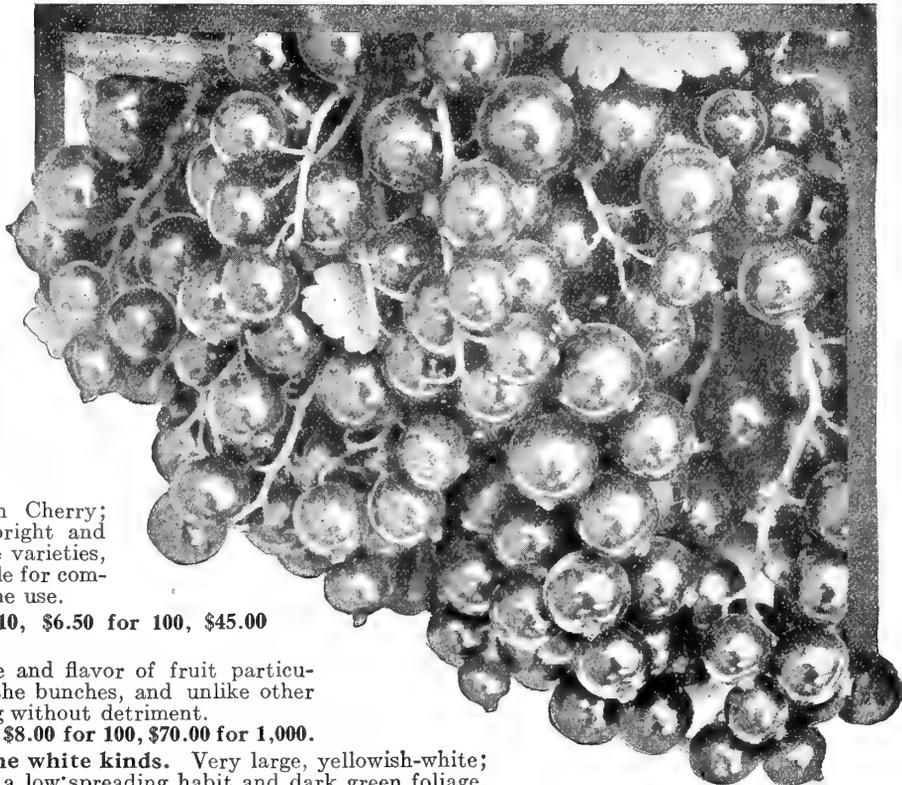

Price, 15 cts. each, \$1.00 for 10, \$6.50 for 100, \$45.00 for 1,000.

Black Champion.—Bushes large and flavor of fruit particularly delicious. It hangs low on the bunches, and unlike other varieties, bears the severest pruning without detriment.

Price—20 cts. each, \$1.50 for 10, \$8.00 for 100, \$70.00 for 1,000.

White Grape.—The finest of the white kinds. Very large, yellowish-white; mild acid; fine for the table. Has a low-spreading habit and dark green foliage. Very productive. Price—15 cts. each, \$1.00 for 10, \$6.50 for 100, \$55.00 for 1,000.

JAMES VICK'S SONS, Fiskdale, Mass., May 4, 1916.
Dear Sirs:—Our currants, berries and rhubarb roots arrived this afternoon—all in good condition. The Ozark strawberry plants came all right and every one lived; they look fine.
Yours respectfully, MRS. SUSAN R. DOUTY,
Southbridge, Worcester County, Massachusetts.
R. F. D. No. 2

Perfection Currants

JAMES VICK'S SONS, Lancaster, N. H., May 21, 1916.
Gentlemen:—The apple trees came in excellent condition. Thanks.
Yours truly, MRS. BURLEIGH ROBERTS.

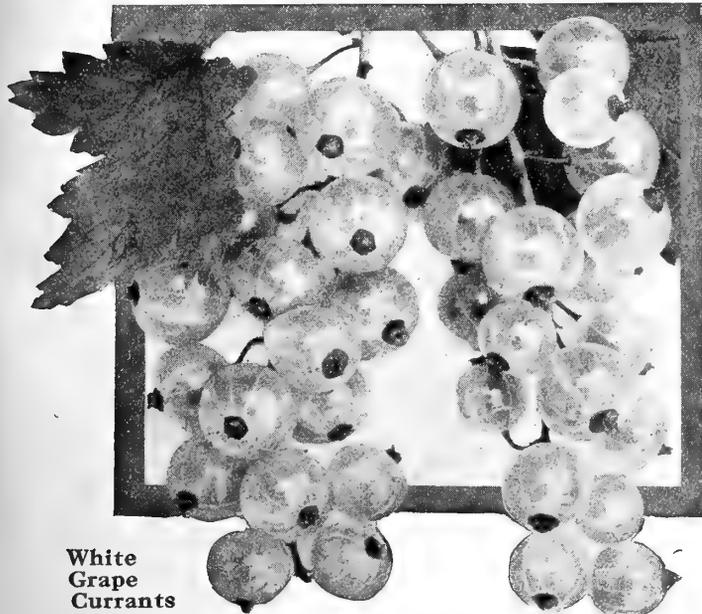

JAMES VICK'S SONS, Waterbury, Conn., May 2, 1916.
Gentlemen:—The currant bushes arrived in good condition and am very well pleased with your stock. 39 Montgomery St.
Yours truly, J. R. WALKER.

Currants and Gooseberries should be mulched every spring and well pruned, so that new wood may have a chance to grow. The ground about them should be kept in good condition by manure and cultivation. The worms may be destroyed with certainty by applying White Hellebore powder shaken from a coarse bag as soon as they appear, and repeating the operation once or twice.

W. Somerville, Mass., May 2, 1916.
MESSRS. JAMES VICK'S SONS, Rochester, N. Y., 5 Chandler St.
Gentlemen:—The package of three St. Regis raspberry and three currant plants to hand last evening, and are set out carefully at this time of writing. They came in good condition; and permit me to say that I am very much pleased with the plants, both as to age, size and evidence of health and vigor of growth. I have not been accustomed to receive such plants at such prices as you have sold these. Especially are the raspberry plants strong, well-rooted and in exceedingly good shape, for all of which accept my hearty appreciation; but I confess I am puzzled to understand how you do it, judging by my past experience with other firms in the same line. Sincerely yours, L. A. BOSWORTH.

Buy Direct from the Grower

In the Farmer's Bulletin No. 113 of the United States Dept. of Agriculture, it says: "If the farmer makes his purchase direct from the nurseryman, he will save the expense of the middleman or agent, and is less liable to the mistakes and injuries that occur through repeated handling."

Except Uncle Joe and Progressive

Can you go out in your garden and pick fresh, ripe Strawberries for your table all summer long? If you can't you surely are missing a whole lot of health and enjoyment. There is no reason why everyone with a little garden space cannot raise fine Strawberries. No plant better adapts itself to all conditions and to all sorts of soil, and brings as great returns for the amount of labor and money expended. The varieties we are listing are the very best for the man who wants them for his own use and for the commercial grower. We especially recommend to you VICK'S UNCLE JOE.

Early Ozark.—The very best early commercial berry. Fruit is firm, good color, high quality and excellent flavor. Plant is a strong grower and very productive. Perfect.

St. Louis.—This very early berry is specially recommended for the Home Garden. It is extremely large, well formed, bright red, and of good quality. Perfect.

Progressive
Senator Dunlap.—Without a doubt the greatest all-round berry grown. Popular in every part of the country. Very hardy and productive. Berries are of good size, bright, glossy, red, and of good quality. Perfect.

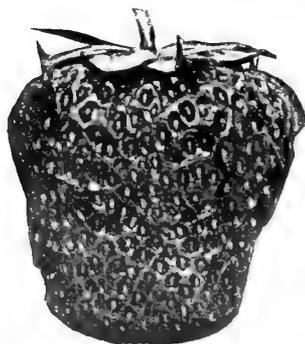

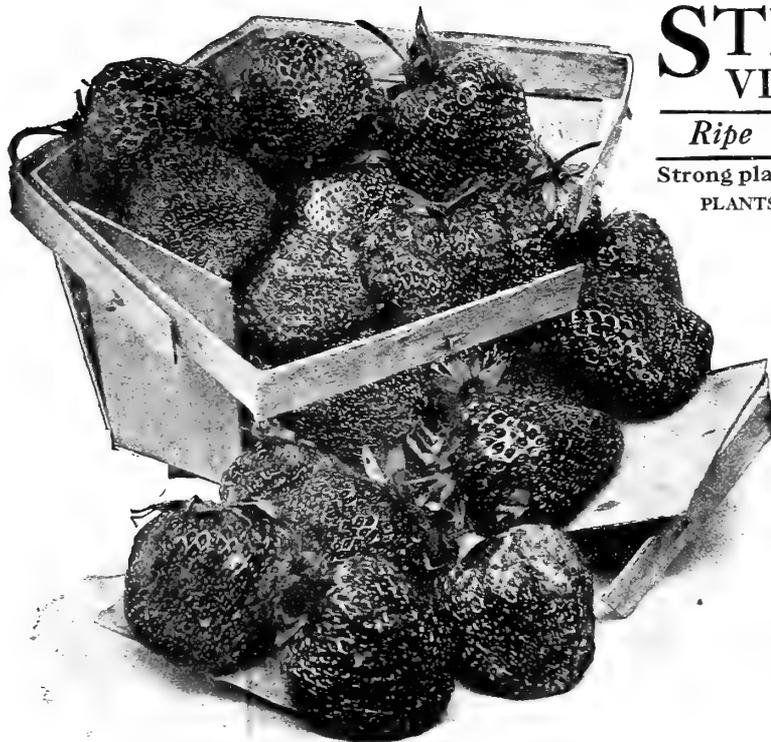

Monroe.—This is a second early berry. Fruit is deep red all over, no green spots at all; fine quality and largest size. As a medium early berry it cannot be equalled. Awarded the Berry Gold Medal by The Western New York Horticultural Society. We recommend this for both market and table use. Perfect.

Bubach.—Season early to medium. Among the leaders of old standard varieties. Fruit large and handsome, conical, bright scarlet, moderately firm, rich in flavor. Succeeds on light or heavy soil. Desirable for home use and market. Perfect.

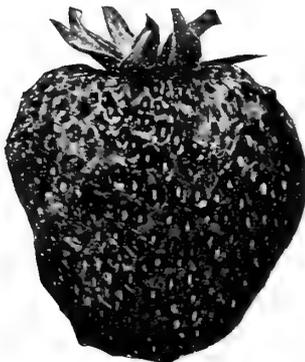

Marshall.—An old, well known berry. One of the largest on the market. A strictly fancy variety, extremely large, of fine quality and very handsome. Perfect.

Haverland.—A very long season berry and very productive; fruit large, long, bright red, firm and of fine quality. Plants large and vigorous. A reliable and well known standard variety. Imp.

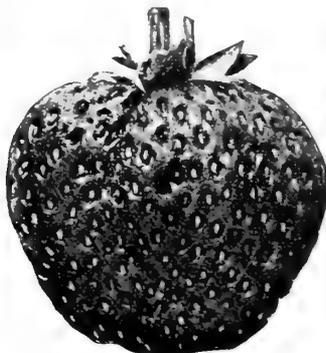

Warfield.—For canning and making preserves of all kinds this is a favorite variety on account of its rich flavor and high color. Will produce a great crop of medium sized, highly colored and flavored berries. Imp

Glen Mary

Chesapeake

Senator Dunlap

Our Strawberry plants as sent direct to you from the Strawberry Plant Farm. This means that you get freshly dug plants, well packed

VICK'S UNCLE JOE

The Home Garden Berry

For a fancy bright red table berry of extra large size and high quality, this variety of our own cannot be beaten. The flesh is tender, juicy and delicious; flavor rich, mild, subacid. Plants are strong growing and very hardy. If you want something especially fine as a table berry, plant Vick's Uncle Joe.

Price—Doz. 50 cts., 25 plants 75 cts., 100 plants \$2.50, 1,000 plants \$11.00.

PROGRESSIVE

The Best Fall Bearing Strawberry

This is the leading fall-bearing variety. The fruit is of fine quality, highly colored, deliciously flavored and red to the core. Bears its crops of good sized berries until November. Every garden should contain some of these wonderful plants. Send in your order early. Plants are shipped out as soon as the weather permits us to dig. See outside back cover. Price for Progressive—Doz. \$1.25, 25 plants \$2.00, 100 plants, \$7.00.

Glen Mary.—Ripens late mid-season and a great favorite in New England, Middle West and the Northwest. Here it has been the leading variety for the last fifteen years. Not only a berry for the fancy local market, but a fine berry for distant shipments. Fruit big, bright red with prominent bright yellow seeds; meat is rich and juicy, and of rare high flavor. We recommend Glen Mary to our customers. Imp.

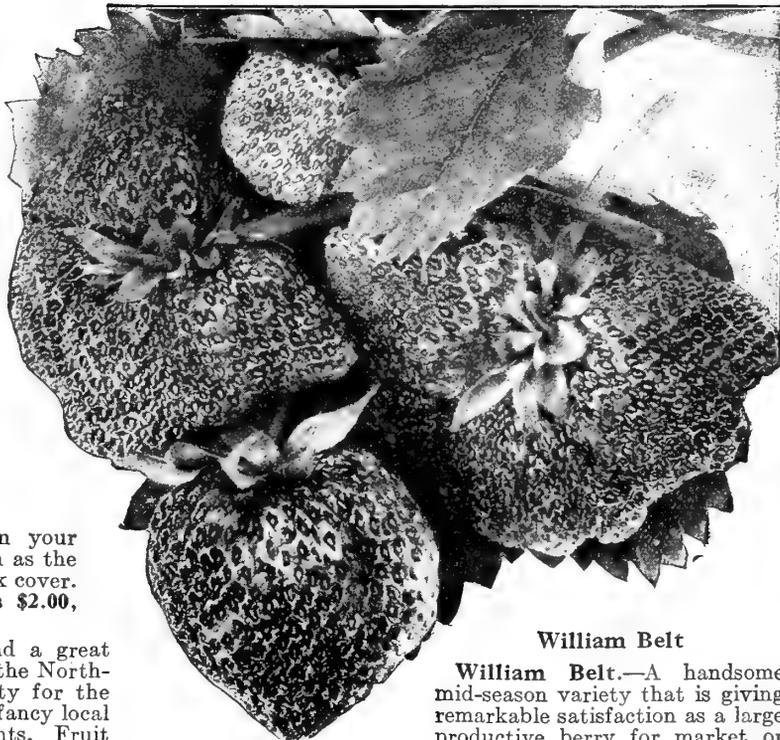

Sample.—Few varieties have brought their growers as much profit as Sample. A perfectly formed berry, dark red, very large; delicious in flavor, very productive; very firm and a good shipper. Sample is a reliable standard variety that can be planted with confidence. Late mid-season. Imp.

Steven's Late Champion.—Large, fine colored, late, productive berry. Well known and well liked everywhere. Perfect.

Brandywine.—A large, broad, heart-shaped berry, delicious. Medium red color, flesh is firm. Will thrive on most any kind of soil. A mid-season berry. Perfect.

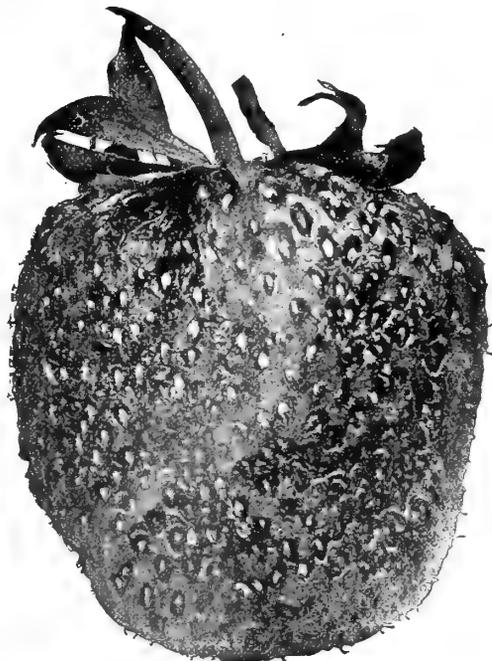

Chesapeake.—A late, popular, new, quality berry. Flesh is dark red, juicy, sweet, highly flavored. For quality in the highest degree plant Chesapeake. Perfect.

Gandy.—A large, late berry, heavy yielder, strong grower. Fruit very firm, and of good quality. On the market brings fine prices. Perfect.

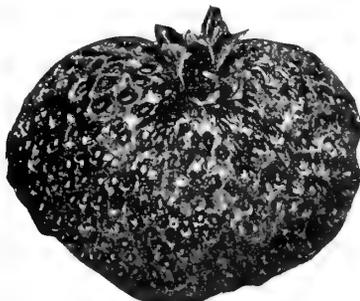

William Belt

William Belt.—A handsome mid-season variety that is giving remarkable satisfaction as a large productive berry for market or home use. Ripens all over without green tips; good quality; carries well to market and brings highest price. Perfect

Vick's Grape Vines

The grape is the most healthful of all fruits, and the most highly esteemed for its many uses. It can be grown by everyone who has a garden, a yard, or a wall. It can be confined to a stake, bound to a trellis, trained over an arbor, or extended until it covers a large tree or building, and still it yields its graceful bunches of luscious fruit.

Campbell's Early.—Strong, vigorous, hardy vine; thick, healthy, mildew-resisting foliage; always setting its fruit well and bearing abundantly. Berries large; black, with light purple bloom. Flavor rich, sweet, slightly vinous. Very early. **Strong 2 year—25 cts. each, \$2.25 for 10, \$20.00 for 100.**

Niagara (White).—Bunch very large and handsome, often shouldered, compact; berries large, round; skin thin, tough, does not crack and carries well; has not much pulp when fully ripe; melting sweet. Should be in every garden. **Strong 2 year—20 cts. each, 35 cts. for 2, \$1.25 for 10, \$8.00 for 100.**

Brighton.—A large, delicious, sweet red grape; vine thrifty and a strong grower; flesh sweet, tender and very juicy. Best of all large red grapes. First of September. **Strong 2 year—20 cts. each, \$1.25 for 10, \$8.00 for 100.**

Concord (Black).—Bunch large, shouldered, compact, berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet pulp, tender; vine a strong grower, very hardy, healthy and productive. **Strong 2 year—15 cts. each, 2 for 25 cts., 90 cts. for 10, \$7.00 for 100, \$50.00 for 1,000.**

Delaware.—Bunches small and compact; berries small round, thin skinned, light red. Flesh very juicy, with an exceedingly sweet and delicious flavor. Vine hardy and productive. **Strong 2 year—20 cts. each, \$1.25 for 10, \$7.00 for 100.**

Salem.—Bunch large and compact; berry large, of a light chestnut or Catawba color; thick skinned, perfectly free from hard pulp; very sweet and sprightly, with a most exquisite aromatic flavor; as early as Delaware. **Strong 2 year—20 cts. each, 50 cts. for 3, \$1.25 for 10, \$8.00 for 100.**

Worden.—Said to be a seedling of the Concord. Bunch large, compact, handsome; berries large—larger than those of the Concord. It ripens a few days earlier, and is superior to it in flavor. Destined to become very popular for the vineyard and garden. **Strong 2 year—15 cts. each, 25 cts. for 2, \$1.00 for 10, \$8.00 for 100.**

Diamond.—Bunch large, compact; berry medium size; color greenish-white with a yellow tinge; flesh juicy and almost without pulp; very good. Vine vigorous and productive. **Strong 2 year—20 cts. each, \$1.25 for 10, \$9.00 for 100.**

Moore's Early.—Bunch large, berry round; color black, with a heavy blue bloom; quality better than the Concord. Vine exceedingly hardy; has been exposed to a temperature of more than 20 degrees below zero without injury, and is entirely exempt from mildew or disease. Its earliness makes it desirable for an early crop, maturing as it does ten days before the Hartford, and twenty before the Concord. **Strong 2 year—20 cts. each, 50 cts. for 3, \$1.50 for 10, \$9.50 for 100.**

Add 2 cents per vine for Parcel Post charges.

Norway Maple make excellent trees to plant for street shade. They are fast growing, beautifully formed and have dense, handsome foliage

VICK'S ORNAMENTAL TREES

More and more it is being realized that property, no matter where located, is greatly increased in value if properly planted with shade and ornamental trees. The expense is not to be compared with the added value given to the property, and no better investment can be made.

It is a well-recognized fact that trees and hedges about farm property not only add to the beauty and comfort of the home, but increase the monetary value of the property. Illustrations of this may be found in many localities where well-planted property brings a considerably higher price than an adjoining place that has not been planted, yet the other conditions are equal.

The many ways in which ornamental trees can be used make them one of the most important items in a nursery catalogue. More and more are people coming to love out-door life, and with it comes a deeper admiration for trees and shrubs. This appreciation and love of nature is usually first noted about the home grounds, and is followed by increased interest in city street plantings and parks.

ORNAMENTAL TREES FOR SPECIAL PLACES

For City Streets.—Sugar Maple, Norway Maple, American Elm, American Ash, American Linden, Oriental Plane.

Rapid Growing Street Trees.—Silver Maple, Ash-leaf Maple, Carolina Poplar.

Trees for Screens.—Carolina and Lombardy Poplar, White Flowering Dogwood.

Ash, American.—A well known native tree of largest size. Thrives in any soil, suitable for street or avenue. Price—6 to 8 ft., 50 cts.; 8 to 10 ft., 75 cts. each.

American White Oak.—One of the finest American trees, of large size and spreading branches; leaves lobed, pale green above and glaucous beneath. 5 to 6 ft., \$2.00 each.

Beech, European.—A compact tree attaining the largest size, retains its leaves brown and dry throughout the winter. Price—5 to 6 ft., \$1.50; 6 to 8 ft., \$2.00 each.

Beech, River's Purple-Leaved.—A variety of European beech with large, smooth, very dark leaves. The best purple lawn tree known. Price—3 to 4 ft., \$1.00; 4 to 5 ft., \$1.75 each.

Best Lawn Trees.—Norway Maple, Schwedler's Maple, Cut-leaf Weeping Birch, Catalpa Speciosa, Purple-leaf Beech, Tulip Tree, American Mountain Ash, the Oaks, English Elm, the Lindens.

Low Growing Lawn Trees.—Japan Maple, Catalpa Bungeii, Japan Weeping and Flowering Cherries, the Dogwoods, Double Flowering Thorns, Magnolias, Weeping Mulberry, Bechtel's Flowering Crab.

Birch, Cut-Leaf Weeping.—Its tall slender, yet vigorous growth, graceful drooping habit, silvery white bark and delicately cut foliage present a combination of attractive characteristics rarely met with in a single tree. Extra fine well rooted trees this year, \$1.00 each; \$10.00 per dozen.

Butternut.—Valued for its tropical appearance and beautiful wood, as well as for its nuts. Produces large, handsome, elongated nuts with rich, sweet, oily kernel; very nutritious. The tree grows rapidly and yields large crops in a few years. There are large profits in butternut growing. A small outlay will bring large returns as soon as the trees begin to bear. 5 to 7 ft., 50 cts. each.

Have you ever noticed in your neighborhood the great improvement a few trees planted around a house makes in its general appearance?

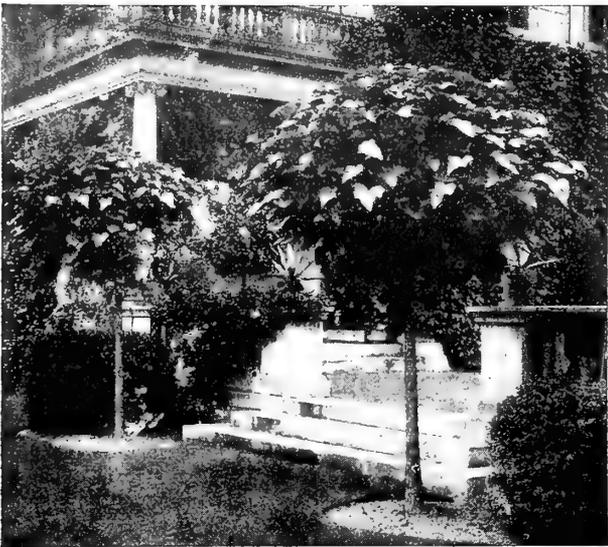

Cut Leaf Weeping Birch

American Linden or Basswood.—A rapid growing, large-sized, beautiful native tree, with very large leaves and fragrant flowers. 6 to 8 ft., 75 cts. each.

Chestnut, Double White Flowered.—A beautiful well-known tree of roundish form with dark green foliage and abundance of spikes of white flowers, slightly marked with red. Hardy. 4 to 5 ft., \$1.00 each.

American Sweet Chestnut.—A valuable native tree, both useful and ornamental. When grown in open ground it assumes an elegant form; foliage rich and glossy. Nuts sweet, of delicate flavor, and are a valuable article of commerce. 4 to 5 ft., 50 cts. each, \$4.50 for 10.

Catalpa Bungeii—Umbrella Catalpa

Crab, Bechtel's Double Flowering.—One of the most beautiful of the many fine varieties of flowering crabs. Tree of medium size, covered in early spring with large, beautiful, double, fragrant flowers of a delicate pink color. From a distance the flowers have the appearance of small roses. Blooms when quite young. 3 to 4 ft., 75 cts. each.

American Elm.—The most admired of all American trees. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more elm trees planted along our streets and highways than any other one variety. This on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world. See picture on page 26. Price—8 to 10 ft., 75 cts. each; 10 to 12 ft., \$1.00 each.

Flowers of
Catalpa
Speciosa—

Pink and
White

Catalpa Speciosa (Hardy or Western Catalpa).—Very popular throughout the country on account of its hardy nature, very desirable for fence posts, railroad ties, etc. It has immense leaves, velvet brown when they first appear, changing to rich dark green; followed by immense panicles of pink and white flowers. 6 to 8 ft. trees, 50 cts. each; 8 to 10 ft., 60 cts. each.

Catalpa Bungeii (Umbrella Catalpa).—Grafted on stems 6 to 8 ft. high, it makes an umbrella-shaped top without pruning; perfectly hardy, and flourishes in almost all soils and climates; leaves large, glossy, heart-shaped, deep green; always making a symmetrical head. One of the most unique trees; desirable for lawn, park and cemetery. Two-year trees, extra large, \$1.00 each.

The Dogwoods are Covered with these Beautiful Flowers

Dogwood, White Flowering.—A fine American tree, growing from sixteen to twenty-five feet high. Foliage of a grayish green color; very glossy and handsome, turning in the autumn to a deep red, rendering the tree one of the most beautiful objects at that season. The flowers appear before the leaves in the spring and are about three inches in diameter, white and very showy. One of the most valuable ornamental trees. Strong, well rooted tree, that will grow quickly, \$1.00 each.

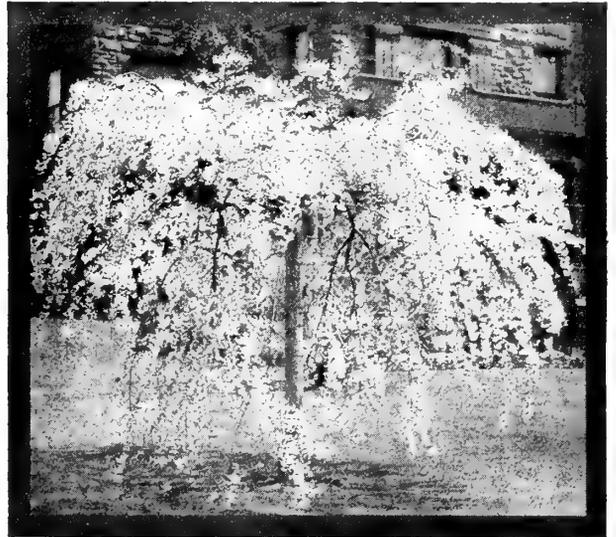

Dogwood, Red Flowering.—A valuable variety producing beautiful carmine flowers; of great value. Price, \$1.50.

Magnolia Acuminata (Cucumber Tree).—A beautiful pyramidal-growing native species, growing to the height of 60 or 70 feet, with large glossy leaves; flowers yellow tinted with bluish purple. Price—75 cts. each.

Magnolia Speciosa (Showy Flowered Magnolia).—Of shrubby, branching habit flowers smaller than *Soulangiana* and lighter in color; fully a week later; and remain in perfect condition upon the tree longer than those of any other Chinese variety. One of the hardiest. \$2.00 each.

Magnolia Soulangiana (Soulang's Magnolia).—Shrubby and branching while young, but becoming a fair size tree. Flowers white and purple cup-shaped and 3 to 5 inches in diameter. Foliage large, glossy and massive. \$2.00 each.

Thorn, Paul's New Double Flowering.—This tree deserves to be classed among the most beautiful of all ornamentals. It is a dense, low grower, and occupies but little space; well adapted to beautify small grounds. Flowers are bright carmine red color and bloom in May and June. Price—3 to 4 ft., 50 cts. each.

Japan Rose Flowered Weeping Cherry

Japan Rose Flowered Weeping Cherry.—The branches are slender, and fall gracefully to the ground. The flowers are rose-colored, appearing before the leaves. The finest weeping cherry, and one of the finest of all weeping trees. \$1.25 each.

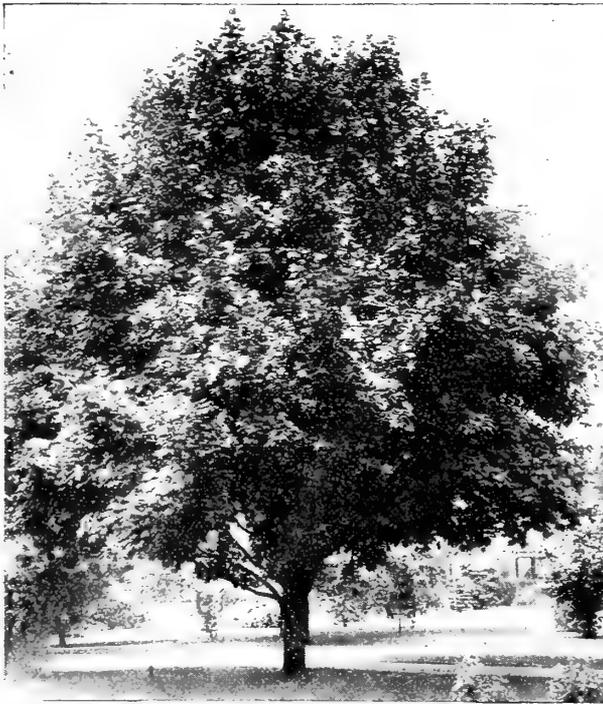

Thorn, Double White.—Has small, double white flowers. A highly ornamental variety, on account of both foliage and flowers. Makes a very striking contrast when planted with the double scarlet. Strong trees. 50 cts. each. Scarlet, same price.

Maple, Japan Blood-Leaved.—Dwarf habit and roundish form. Foliage very handsome, leaves cut and serrated, reddish-crimson in June, changing to dark purple which it retains all summer. Price of specimens with ball of earth on roots burlapped, \$2.00 each, ball of earth.

Maple, Weir's Cut leaf.—This is one of the most remarkable and beautiful trees with cut or dissected foliage yet offered. Its growth is rapid, shoots slender and drooping, giving it a habit almost as graceful as the cut-leaved birch. Foliage is abundant, leaves green on the top, silvery underneath. One of the most valuable and handsome of the ornamental trees. Price—6 to 8 ft., 60 cts.; 8 to 10 ft., 80 cts.

Japan Blood Leaved Maple

Norway Maple, the great shade tree

Maple, Norway.—One of the most beautiful and desirable trees known, of large size, perfect outline, with deep green foliage. Its compact habit, stout, vigorous growth, freedom from disease and insects, render it one of the most desirable trees for the street, park or garden.

Price—	Each	10	100
8 to 10 ft.....	\$0.75	\$ 7.00	\$60.00
10 to 12 ft.....	1.25	10.00	80.00

The Stately Sugar Maple

Maple, Ash-Leaved or Box Elder.—A fine rapid growing variety, with handsome, light green foliage and spreading head; very hardy, desirable for street planting and succeeds in many sections where other varieties do not thrive. 50 cts. each, \$4.00 for 10.

Maple, Schwedler's or Purple-Leaf.—A beautiful variety of Purple-Leaf Norway with long shoots and leaves of bright purple and crimson color, which change to purplish-green on older leaves. 6 to 8 ft., \$1.00 each.

Maple, Silver Leaf or Soft Maple.—A well-known native tree of rapid growth, large size, and rounded form. Foliage bright green above and silvery-white beneath; tree very hardy and easily transplanted. One of the most useful trees.

Price—	Each	10	100
6 to 8 ft.....	\$0.50	\$4.50	\$35.00
8 to 10 ft.....	.75	6.50	50.00
10 to 12 ft.....	1.00	8.50	70.00

Tea's Weeping Mulberry

Mulberry, Tea's Weeping.—One of the finest, most graceful and satisfactory of weeping trees. Umbrella shaped head, with slender willowy branches drooping to the ground. It has beautiful glossy foliage, handsomely cut or divided into lobes. It is perfectly hardy. \$1.00 each.

Maple, Sugar or Rock.—A native tree valuable for its production of sugar and wood. Very stately in form, rapid grower and has fine foliage. Valuable ornamental variety.

Price—	Each	10	100
6 to 8 ft.....	\$0.70	\$ 6.00	\$50.00
8 to 10 ft.....	1.00	9.00	80.00
10 to 12 ft.....	2.00	15.00	120.00

Mulberry, Downing.—This tree is not alone valuable for the large refreshing berries it bears, but is very handsome as a lawn or street tree. 4 to 5 ft., 50 cts. each.

Walnut, Japan.—A choice imported variety, grows with great vigor, forming a handsome head without pruning, and has withstood a temperature of 20 degrees below zero without injury. The shell is a little thicker than that of the English Walnut, which it resembles in a general way; the kernels are meaty, delicate, and can be removed entire. The trees begin to bear when two or three years old. **50 cts. each.**

English, Persian, or Madeira.—A fine, lofty-growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. An exceedingly handsome tree for the lawn. **50 cts. each.**

American Black.—The large, oily nuts are borne in heavy crops. They are much relished by all persons, old and young, and always sell at a fair price. The tree grows quite fast; its dark, rich wood is exceedingly valuable. **50 cts. each.**

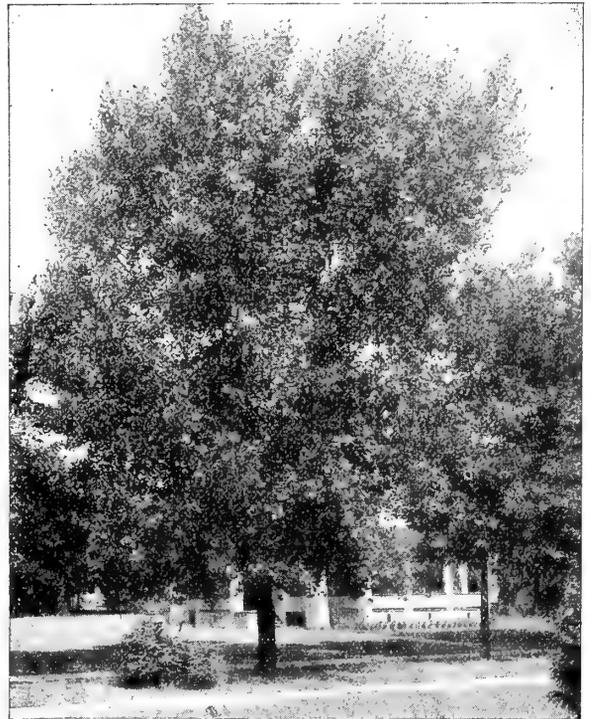

Mulberry, Russian.—A hardy variety of mulberry. Tree is a rapid grower; foliage is abundant. **7 to 8 ft., 40 cts. each.**

Lombardy Poplar.—Grows to a height of from 100 to 150 feet. Well known and remarkable for its erect, rapid growth and tall, spiry form. Indispensable in landscape gardening, to break the ordinary and monotonous outlines of most other trees.

Price—	Each	10	100
6 to 8 ft.....	\$0.30	\$2.75	\$25.00
8 to 10 ft.....	.40	3.50	30.00
10 to 12 ft.....	.60	5.00	45.00

Lombardy Poplar Planted as a Windbreak and Screen

Carolina Poplar, a Fast Growing Tree, used for Street Shade

Carolina Poplar.—One of the most rapid growing trees; its branches are spreading, the leaves are large, handsome and glossy. The best of the poplars, and especially adapted to planting in large cities, where it resists the smoke and gas and soon affords a dense shade.

Price—	Each	10	100
6 to 8 ft.....	\$0.25	\$2.25	\$18.00
8 to 10 ft.....	.35	3.00	25.00
10 to 12 ft.....	.45	4.00	35.00

Magnolia Soulangeana on Oxford Street, Rochester, N. Y.

Not only is the Japan Walnut very useful for the nuts it bears, but is very ornamental for street or lawn planting. Please Order Early.

Both winter and summer these Evergreens are very beautiful in their dark green and golden foliage.

CHOICE HARDY EVERGREENS

Our list of Hardy Evergreens comprises the best varieties for grouping or for single specimens on the lawn, where both summer and winter their green, silver-blue or golden foliage is very beautiful. Evergreens are becoming more and more popular. They give a finish to houses of certain style that cannot be equaled by other plantings. We recommend spring planting and can furnish specimens of these varieties of beautiful form, in many different sizes, freshly dug, with roots in a ball of earth and burlapped.

Retispora
Plumosa

ARBOR VITAE—Thuya

American—White Cedar.—Much used for hedges, screens, singly on lawns or in tubs for porches. A handsome little tree, and if allowed to grow naturally will be tall and pyramid-shaped. Can be trimmed and kept in any form and height. In summer the foliage is bright green above, yellowish beneath.

	Each	10	100
2 to 3 ft.....	\$0.70	\$6.00	\$50.00
3 to 4 ft.....	.85	7.00	60.00
4 to 5 ft.....	1.15	9.00	80.00

Pyramidalis.—A very compact, erect, and beautiful growing Arbor Vitae. Its form is very similar to Irish Juniper. Foliage dark green. Tree very hardy.

	Each	10
1½ to 2 ft.....	\$0.70	\$ 6.00
2 to 3 ft.....	.90	7.50
3 to 4 ft.....	1.40	12.50

Tom Thumb.—Dwarf growing, compact little evergreen. Very beautiful for the lawn or cemetery. 18 to 24 inches, 70 cts. each; 2 to 3 ft., \$1.25 each.

FIR—Abies

Balsam—American Silver.—A very erect tree of pyramidal shape. Dark green foliage. Rapid grower and very hardy. 2 to 3 ft., \$2.00; 3 to 4 ft., \$3.00.

Concolor—White Fir.—A tall silvery-green foliaged tree that makes a splendid specimen. 2 to 3 ft., \$2.50; 3 to 4 ft., \$3.50.

JUNIPER—Juniperus

Irish.—Most popular of the upright growing Junipers. Erect and formal in habit. The foliage is deep green and very compact. Making a splendid tree, shaped like a column. See cut at bottom of page. 1 ft., 75 cts. each; 2 ft., \$1.25 each; 3 ft., \$1.75 each.

Tamarisk Leaved.—A low growing, densely branched trailing plant of very neat habit, covered with foliage of a bright glaucous green. Excellent in banks on rock work. Best and most striking of the Prostrate Junipers. Each \$2.50.

PINE—Pinus

Austrian.—Most valuable Pine for this country. Very hardy and robust. Grows rapidly on sandy poor soil. Fine for seashore planting. 2 ft., \$1.00 each; 3 ft., \$1.50 each; 4 ft., \$2.00 each.

Mugho.—A dwarf growing tree, very dense. Foliage deep green. Very hardy. 1 ft., \$1.00 each; 2 ft., \$1.50 each.

JAPAN CYPRESS—Retinospora

Plumosa.—An exceedingly handsome small Evergreen from Japan, with feathery, light green foliage. A very popular ornamental for the lawn. 2 ft., \$1.25 each; 3 ft., \$2.00 each.

Plumosa Aurea.—Same as Plumosa, except it has golden-yellow foliage. 2 ft., \$1.50 each; 3 ft., \$2.25 each.

SPRUCE—Picea

Koster's Blue Spruce.—Handsome, hardy, symmetrical tree of pyramid form. Very compact. Foliage steel-blue. Very popular as single specimen on the lawn. Don't confuse this with the common blue Spruce. 2 ft., \$3.00 each; 3 ft. \$4.00 each; 4 ft., \$6.00 each.

Norway Spruce.—Extensively planted as an ornamental, for single specimen, hedges and wind-breaks. Foliage dark green. Rapid growing. 2 ft., 75 cts. each; 3 ft., \$1.00 each; 4 ft., \$1.25 each; 5 ft., \$2.00 each.

Irish Juniper

Colorado Blue Spruce

JAMES VICK'S SONS,
Rochester, N. Y.

Hackettstown, N. J., Nov. 2, 1916.

Gentlemen:—The trees came all right. Very satisfactory and very much pleased. Hope they will be all right in the spring.
MRS. H. MEGILL,

EVERGREEN TREES BY PARCEL POST

12 Different kinds put up in packages of 50 or 100 trees. Each package \$1.00, any 6 for \$5.00, prepaid. Fine for hedges, windbreaks and ornamental lawn planting. Safe arrival guaranteed to any point in the U. S. Complete planting instructions and cultural directions will be furnished with each order.

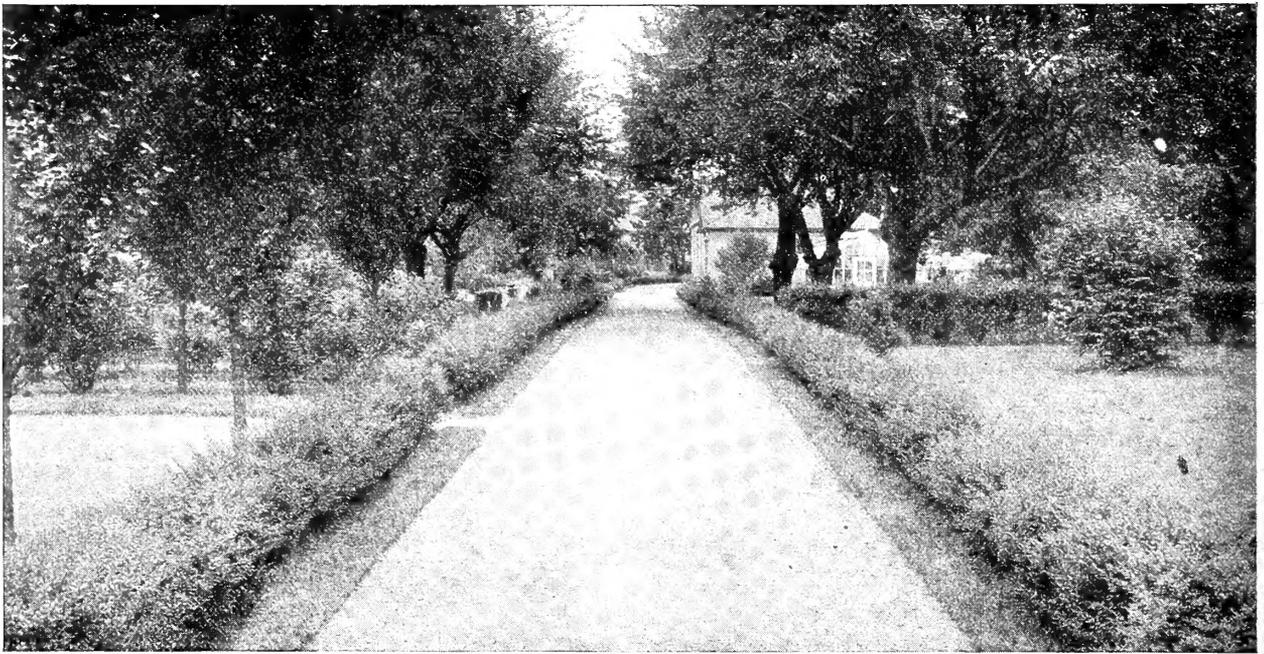

Evergreen trees will bring a new beauty and charm to your home. There is unquestionably no better way of beautifying your place than surrounding it with beautiful Evergreens. As an ornamental tree Evergreens are unsurpassed. No other trees remain green through summer and winter; none are more beautiful. But while their value in this respect is great, Evergreens are most useful in other ways. They protect houses, stock and crops, from wind, sun and snow. They conserve the soil's natural moisture. They form a substantial shelter and nesting place for the birds that rid your acres of worms and destructive insects. They are a source of salable timber for fence posts and other uses. Plant some Evergreens around your garden and just see how much difference there is in the temperature and moisture. You will find that you can grow flowers, fruits and vegetables that you never could before.

These varieties have been thoroughly tested and proven absolutely hardy and reliable and will grow successfully in all parts of the country. Send in your order now. Shipment will be made during March, April or May—depending on locality.

- 1.—100 Norway Spruce, Tall Dark Green 2-5 inch 2 year seedlings
- 2.—100 Scotch Pine, Tall Bluish Green 2-5 inch 2 year seedlings
- 3.—100 Douglas Fir, Tall Dark Green 3-6 inch 2 year seedlings

Price postpaid, \$1.00 per package, any 6 for \$5.00. You cannot afford to overlook these offers. THINK OF IT—100 TREES FOR \$1.00.

To get the true steel-blue color in Spruce that is so much admired you must plant Koster's Blue. A very beautiful Evergreen.

Berberry Thunbergii Makes a Pretty Hedge Along Walks and Drives

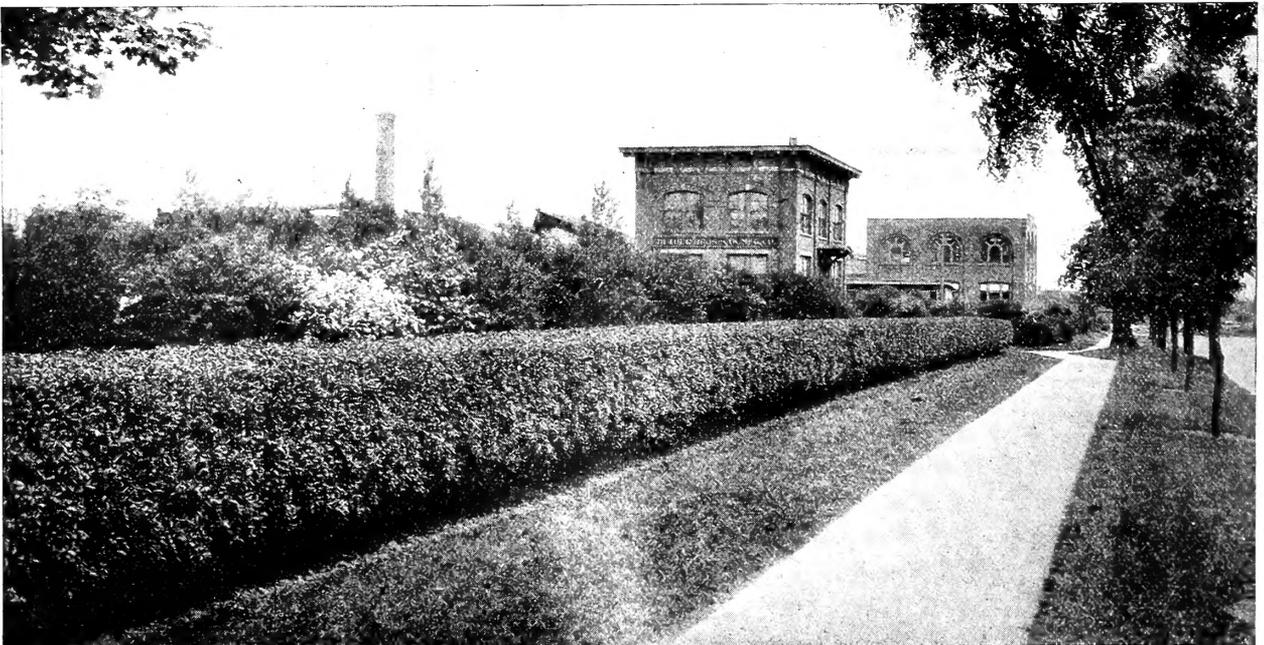

Vick's Hedge Plants

California Privet.—Rapid grower with bright shining leaves. This shrub grows freely in almost any soil, is compact in form and can be trimmed to any desired shape; flowers during June and July. Desirable for hedges.

	25	50	100	1000
12 to 18 in.....	\$0.75	\$1.25	\$2.50	\$20.00
18 to 24 in.....	.90	1.50	3.00	25.00
2 to 3 ft.....	1.00	2.00	4.00	35.00

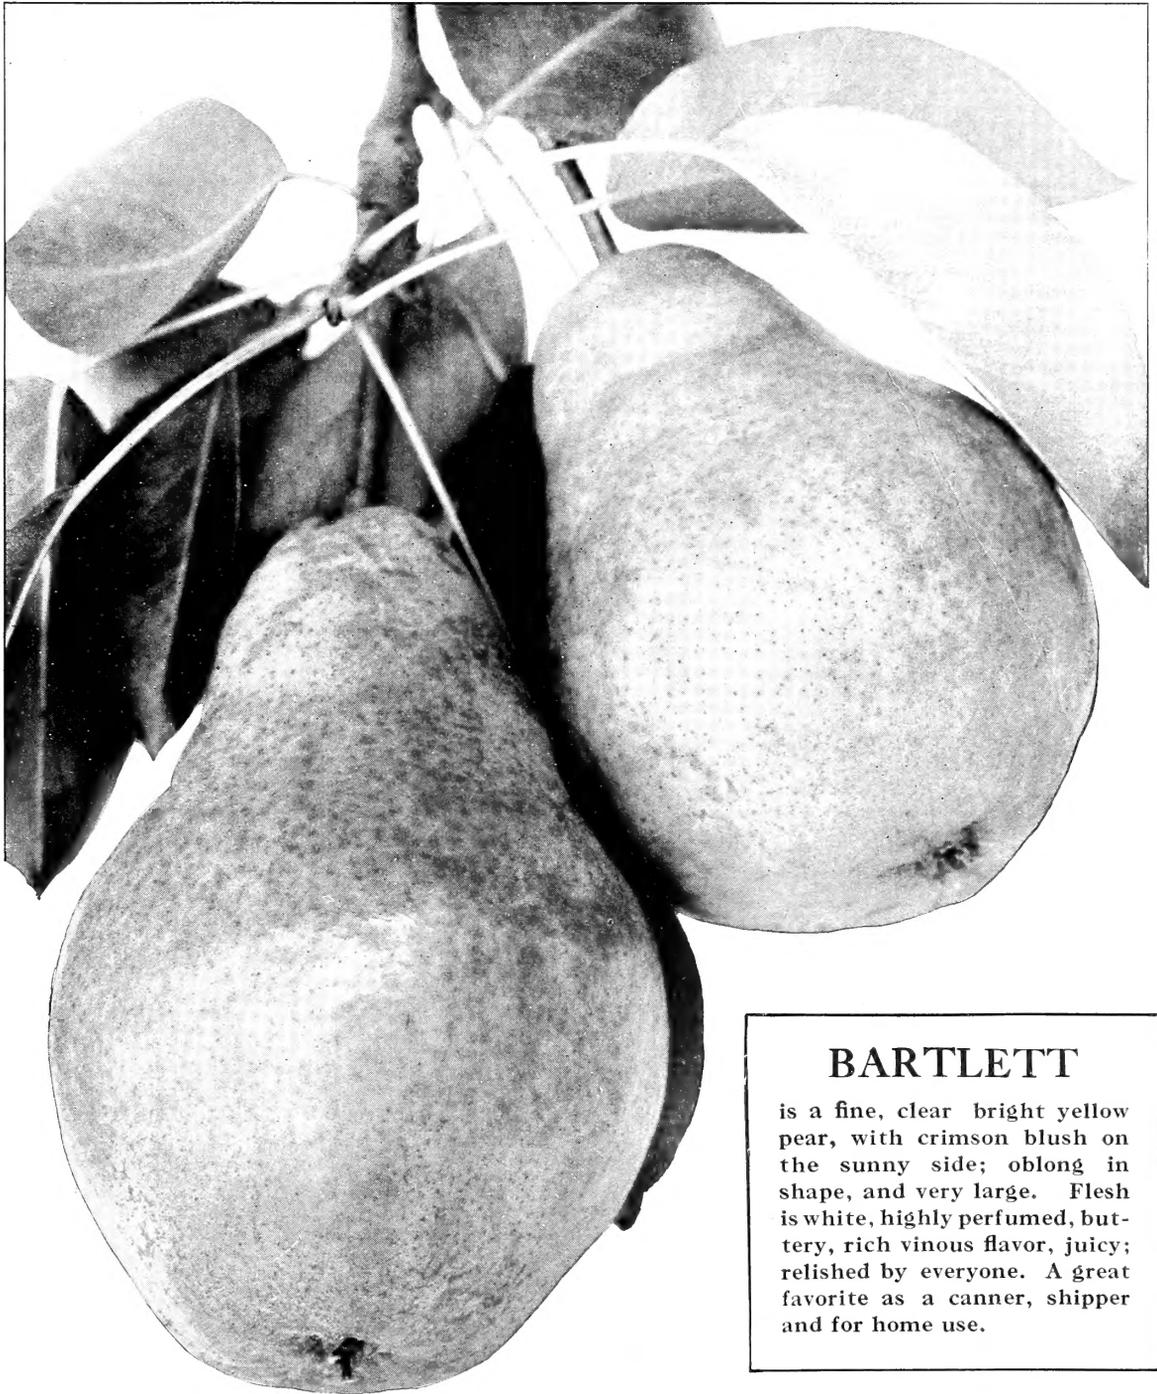

Berberry Thunbergii.—This shrub we particularly recommend to our patrons for a hedge plant. Its hardiness, bushiness and beautiful foliage promise to make it our most popular hedge. The foliage turns a beautiful copper color in the fall and brilliant fruit remain on all winter.

12 to 18 in.....	\$3.50	\$6.00	\$12.00
18 to 24 in.....	4.00	7.00	14.00

California Privet is the most popular hedge plant in all parts of the Country

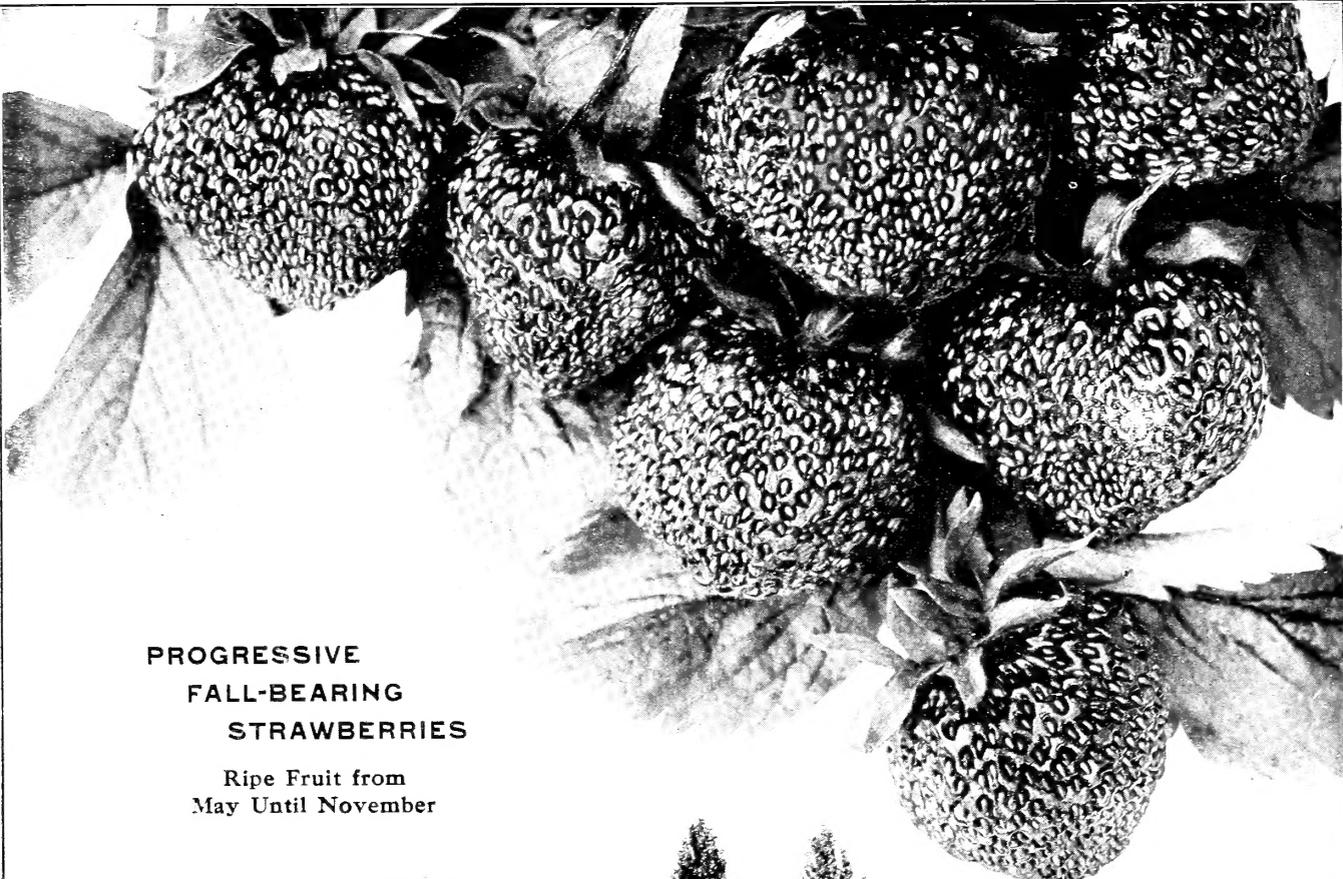

RIPE FRUIT FRESH FROM YOUR OWN GARDEN, TASTES BETTER THAN ANY YOU BUY

BARTLETT

is a fine, clear bright yellow pear, with crimson blush on the sunny side; oblong in shape, and very large. Flesh is white, highly perfumed, buttery, rich vinous flavor, juicy; relished by everyone. A great favorite as a canner, shipper and for home use.

BARTLETT—The very best pear for the Home Garden or the Commercial Orchard
